AÇIKLAMALAR / INFORMATION

DAYANIKLILIK

Bu katalogda yer alan ürünlerden bazlarına tam sertleştirme veya ağız sertleştirme işlemleri uygulanmıştır.

DURABILITY

Some of the items in this catalogue are either full tempered or rim toughened.

SERTLEŞTİRİLMİŞ ÜRÜNLER

- Mikrodalga fırında, aksesuarsız olarak kullanılabilir.
 - Bulaşık makinesi ve buzdolabı kullanımına uygundur.
- Sertleştirme işlemi, ürünlere aşağıda belirtilen avantajları sağlamaaktadır.

TEMPERED ITEMS

- Can be used without accessory in the microwave oven.
- Are suitable for dishwasher and refrigerator usage.

The tempering process provides the following advantages.

FULL TEMPERLEME

Gün içerisinde kullanımda hem temizlik hem de kullanım sırasında sık ısı değişimlerine maruz kalan ürünlerin dayanıklılığını full tem-perleme işlemiyle güçlendiriyoruz. Full temperleme işlemiyle erime noktasına kadar ısıtılmış kontrollü soğutma uygulanan cam ürünler, böylece olası kırılma durumunda küçük ve zararsız parçalara ayrılarak kullanıcının yaralanma riskini en aza indiriyor.

FULL TEMPERING

Full tempering process increases the durability of products which are subject to frequent heat changes during cleaning and use throughout the day. In this process the glass products are heated up to the melting point and then cooled in a controlled manner, which results in the shattering of glass into small and harmless pieces in possible breakages, minimizing the risk of injury.

AĞIZ TEMPERLEME

Ürünlerimizle daha uzun zaman geçirmek istedığınızı biliyoruz. Bardakların ağız bölgesine yoğun ısıtma ve soğutma uygulayarak gerçekleştirdiğimiz temperleme işlemiyle özellikle profesyonel kullanımda kırılma, çatlama ihtimalerini azaltıyor ve ürünlerin ömürlerinin uzamasını sağlıyoruz.

RIM TEMPERED

We know that you want to use our products longer. With the rim tempering process, extensive heating and cooling is applied to the rim, thus minimizing the risk of breaking and cracking while increasing the lifespan of products.

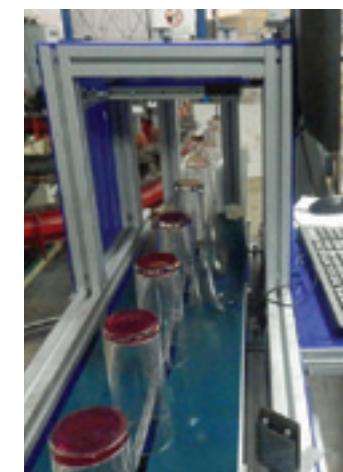

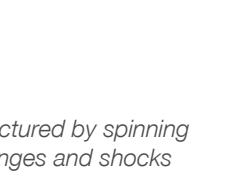

EKSTRA DAYANIKLILIK

Tabak ve kase gibi savurma prosesiyle üretilen ürünlerimiz ani ısı değişimleri ve darbelere karşı özel teknolojilerle ekstra güçlendirilmektedir.

EXTRA RESISTANT

Our products such as plates and bowls manufactured by spinning process are hardened against sudden heat changes and shocks with special technologies.

EL DEĞMEDEN KALİTE KONTROL

Paşabahçe tesislerinde bulunan üretim hatlarının tamamına yakınında otomatik süreçlerle, el deðmeden ve hataya yer bırakmadan kalite kontrol ve hatalı ürün eleme yapılmaktadır. Son teknoloji inspection cihazları ve algoritmalar ile görüntü ve ağız hataları, ayak gövdé hataları ve boyalı ürünlerde renk kontrolü, ton farklılıklarını kolaylıkla tespit edilmekte ve hatalı ürünler elenmektedir.

FULLY AUTOMATED INSPECTION

Almost all of production lines located in Paşabahçe facilities are inspected by fully automated Inspection Technologies. Cutting edge technology inspection machines that use sophisticated algorithms help us to detect and eliminate the flaws on body, rims, stems. Advanced color and hue inspection is applied on decorated and colored glassware.

CAM EŞYA YAPIMINDA KULLANILAN CAM KOMPOZİSYONLARI GLASS COMPOSITIONS USED IN GLASSWARE PRODUCTION

SODA-KIREC CAMI

En çok üretilen ve kullanım alanı çok geniş bir cam türüdür. Her türlü cam kap, düz cam, otomobil camı ve züccaciye üretiminde soda – kireç camı kullanılır.

SODA-LIME GLASS

Soda-lime is the most-produced glass type with a large area of use including all types of glass packaging, flat glass, glassware, and automotive glass.

BOROSILİKAT CAM

Işıya dayanıklı bir cam türü olduğu için fırın cam ürünlerinde kullanılır. Bu kompozisyon düşük ıslık genleşme katsayısına sahiptir ve termal şoklara karşı dayanıklılık gösterir. Sadece ısı anlamında avantaj sağlamakla kalmaz aynı zamanda kimyasal kompozisyon ve üretim teknikleri sonucu yüksek dayanıklılık gösterir.

BOROSILICATE GLASS

As a heat-resistant glass with a low coefficient of thermal expansion and resistance against thermal shocks, this composition is used in the production of ovenware. In addition, it also has high chemical and electrical resistances, which makes it an ideal composition for laboratory accessories. Manufacturing process brings high durability to crystalline applications.

KRİSTALİN CAM

Kurşun içermeyen kristal cam olarak tanımlanan bu kompozisyon, üstün ıslık geçirgenliği, parlaklıðı ve tinisiyla premium ürünlerin üretiminde kullanılır, özel kimyasal kompozisyon ve üretim teknikleri sonucu yüksek dayanıklılık gösterir.

CRYSTALLINE

This lead-free crystal glass composition called crystalline is used for producing premiums with high transmission of light, brightness and superior sonority. This special composition and manufacturing process brings high durability to crystalline applications.

Paşabahçe Tasarımları; Dün, Bugün ve Yarın

Kısaca kendinizi tanıtır mısınız?

1963 yılında Ankara'da doğdum. TED Ankara Kolлежindeki eğitimimi sonrası, ODTÜ Endüstri Ürünleri Tasarımı Bölümü'nü bitirdim. İki senelik mobilya tasarımları deneyimi sonrası, New York'ta Pratt Institute'de Product Design master'i yaptım. Bunun yanı sıra Milano'da Domus Academy yaz tasarım eğitimi programına katıldım. 1991 yılında girdiğim Şişecam şirketinde, ambalaj ve ürün tasarımcısı olarak çalıştım. 1997 yılından beri de, Paşabahçe Cam San. ve Tic. A.Ş. firmasının tasarım müdürü olarak görev yapmaktadır.

Tasarımdaki stilinizi nasıl açıklıksınız?

Tasarımdaki temel yaklaşımımı yalnızlık, fonksiyonellik ve kullanıcısına karşı samimiyet olarak özetleyebilirim. Bir ürünün doğrudan kullanıcısı ile iletişimde olabilemesini çok önemli buluyorum. Burada belirleyici olan yalnızlık, sadelik ve fonksiyonellik kadar tasarımcının kendini ifade edebileceğii, tasarıma katabileceği adeta tüketici ile iletişime geçebileceğii detayları. Bunu en doğru ifade ile kullanıcısının kalbinin kazanan ürünler diye ifade edebilirim.

Tasarımlarınızda nelerden ilham alıyorsunuz?

Tasarımcı her şeyden ilham alabilir. Yaşam tarzi ve ilgi alanları tasarımcıya besleyen en belirleyici öğelerdir. Kendim için sanat ve mimarinin beni çokça etkilediğini söyleyebilirim. Güzel bir heykel ya da resim, etkileyici bir film veya ülkemizde az görebildiğimiz çarpıcı bir mimari eser doğal olarak insanı yeni ufuklar açmaya yetiyor. Ayrıca hangi alanda olursa olsun ortaya konulan her yeni fikir, her yeni obje insanı çok farklı dünyalara taşıyabiliyor.

Paşabahçe ürünlerinin tasarım aşaması hakkında bilgi verir misiniz?

Paşabahçe 140 ülkeye satış yapan, kendi sektöründe dünya liderliğine oynayan konumda. Dolayısı ile farklı pazarların ihtiyaçlarına göre geliştirilecek ürün çeşitliliği ve her yıl yapılan ürün sayısı oldukça yüksek. Bunu sağlayabilmek için de iyi bir tasarım gücüne ihtiyaç var. Bu tasarım gücünü de gerek tasarımcı istihdam ederek, gerekse dış tasarımcılarla çalışarak sağlıyoruz.

Şu anda tüm bu ekip 30'un üstünde tasarımcıdan oluşuyor. Tabii yeni ve doğru bir ürünü çıkartmak sadece tasarımın gücü ile sınırlı değil. Tasarım bölümünde doğru verileri ve talepleri sağlayacak tüm marka, pazarlama, satış ve pazar araştırma bölümlerinin uyumlu biçimde çalışması gerekiyor. Bunun yanı sıra, tasarımın ürüne dönüşme aşamasında yer alan geliştirme ve üretim birimleri de bu sürecin diğer önemli parçalarını oluşturuyor. Özlemek gerekirse, fikirden ürüne giden yol oldukça uzun ve yoğun emek gerektiren bir süreç. Bunu

"Yeni ve doğru bir ürünü çıkartmak sadece tasarımın gücü ile sınırlı değil. Tasarım bölümünde doğru verileri ve talepleri sağlayacak tüm marka, pazarlama, satış ve pazar araştırma bölümlerinin uyumlu biçimde çalışması gerekiyor."

rini yapıyoruz. Yaratıcılık ve estetik farklılık öğelerinin yanı sıra, tüm açılardan bakıldığına tarzı olan, trendler ile uyumlu bir ürünü ne önce ne sonra, tam zamanında ortaya koymak da, tasarım sürecinin en önemli adımı. Tasarımın, yeterince hızlı olması, rekabet için kaçınılmaz olmakla beraber, toplumun yaşam tarzına uygun bir trend benimsenmemiş, ya da ürünün sunulacağı kesimin tarzı bu trend için henüz yeterli olgunluğa gelmemiş olabiliyor. Bu nedenle cam ürün tasarımlında doğru zaman doğru tasarım kadar önemlidir. Paşabahçe bu nedenle dünyanın onde gelen moda ajansları ile koleksiyon çalışmaları yapmakta, yurt içi ve uluslararası pazarda bu farklılığını ortaya koymaktadır.

Tasarım Müdürü Emre Bozbeyli ile Paşabahçe tasarımlarının dünü, bugünü ve yarını ile ilgili hemen her şeyi konuşduk. Atatürk'ün Türkiye'de cam sanayiini kurma ve geliştirme talimatları doğrultusunda 1935 yılında Paşabahçe'de kurulan ilk cam tesisi ile faaliyete geçen firmanın o günden günümüze, cam sektöründeki en ileri teknoloji kullanımı ve araştırma geliştirme faaliyetleri tüm detaylarıyla burada.

doğu biçimde yapabilmek ise iyi bir takım çalışmadan geçiyor.

Sizin için işlevsellik mi, görsellik mi önemli?

Burada önemli olan tasarım kriterlerinden taviz vermeden dengeyi sağlayabilmek. İşlevsiz bir ürün tabii ki kullanıcısını memnun edemez, ama sadece fonksiyonellik uğruna da cazip olmayan bir ürün yaratmak doğru olmayacaktır. Tasarımın en büyük problemi de bu denklemi çözmekten geçiyor. Ben bu durumu görselliğten taviz vermeyen fonksiyonellik olarak tanımlıyorum.

Tasarımda sizi en çok rahatsız eden unsurlar nelerdir?

Ürünün doğasına uymayan her şey diye özetleyebilirim. Zorlama detaylar, gereksiz süslemeler, kullanıcıya doğrudan fayda getirmeyen bir takım eklemeler. Bunlar hangi nedenden veya hangi akım doğrultusunda kullanılrsa kullanılın, ürünü gerekte olması gereken uzaklaşdırın unsurlardır.

Bu sezonun tasarım stilleri ve detayları nasıl olacak?

Bu sezonun veya her sezonun tasarım stillerini belirleyen şey, insanların yaşam tarzını etkileyen ve onları farklı alışkanlıklarla iten sosyal akımlar aslında. Gündümüzün değişen yaşam şartları ve bireyselleşme insanların daha kendine yönelik olmalarını sağlıyor. Bu da onları daha kişiselleşmiş eşya kullanımına doğru yönlendiriyor. Biz buradan yola çıkararak farklı ünlülere yönelebiliyoruz.

Moda ve tasarım arasındaki ilişki nedir?

Günümüzde gittikçe karmaşık ve kaçınılmaz bir şekilde gelişen moda olgusu ve genel trendler, diğer sektörlerde de olduğu gibi cam ürün için de belirleyici olmaktadır. Tekstilde, ev dekorasyonunda veya herhangi bir tüketim eşyasında olduğu gibi camda

da modaya bağlı form, renk ve desen uygulamalarını yapıyor. Yaratıcılık ve estetik farklılık öğelerinin yanı sıra, tüm açılardan bakıldığına tarzı olan, trendler ile uyumlu bir ürünü ne önce ne sonra, tam zamanında ortaya koymak da, tasarım sürecinin en önemli adımı. Tasarımın, yeterince hızlı olması, rekabet için kaçınılmaz olmakla beraber, toplumun yaşam tarzına uygun bir trend benimsenmemiş, ya da ürünün sunulacağı kesimin tarzı bu trend için henüz yeterli olgunluğa gelmemiş olabiliyor. Bu nedenle cam ürün tasarımlında doğru zaman doğru tasarım kadar önemlidir. Paşabahçe bu nedenle dünyayı önde gelen moda ajansları ile koleksiyon çalışmaları yapmakta, yurt içi ve uluslararası pazarda bu farklılığını ortaya koymaktadır.

Paşabahçe Designs; Yesterday, Today and Tomorrow

Can you introduce yourself briefly please?

I was born in Ankara in 1963. After my schooling at TED Ankara College, I graduated from Middle East Technical University's Industrial Products Design Department. Following two years of experience in furniture design, I completed a Master's Degree in Product Design at Pratt Institute in New York. Additionally, I participated in a summer design course at Domus Academy in Milan. I joined the Şişecam Company in 1991 and worked in packaging and product design. I have been serving as Design Manager at Paşabahçe Cam Sn. ve Tic. A.Ş. since 1997.

How would you describe your style in design?

I can summarize my basic approach to design as simplicity, functionality and sincerity toward the user. I find it very important for a product to be in direct communication with its user. The determining factor is not just simplicity, plainness and functionality but the details that communicate to the consumer the designer's own statement and what the designer can contribute to the design. I can express this best by saying, products that win the heart of their user.

Where do you get your inspiration from in your designs?

A designer can be inspired by anything. Lifestyle and area of interest are the most determining factors that nourish the designer. As for myself, I can say that I am amply influenced by art and architecture. A beautiful statue or painting, an impressive film or a striking work of architecture that we see so little of in our country is enough to naturally open up new horizons to a person. Also, whatever area it might be in, every new idea, every new object can carry you to very different worlds.

Could you give us some information about the designing phase of Paşabahçe products?

Paşabahçe sells its products to 140 countries and is a major player competing for world leadership in its own sector. That is why there is a diversity of products that are developed and the number of items produced every year is quite high. There is a need for a strong sense of design in order to accomplish this. This strength of design is captured by employing designers and working if necessary with international designers. At the moment, the entire team consists of more than 30 designers. Of course, producing a new product and producing the right one is not limited to the strength of design. All of the brand, marketing, sales and marketing research departments have to work in harmony to provide the designing department with the right data and demand. At the same time, the development and production units comprise the other important parts of the process, joining in at the stage where the design turns into a product. To summarize, the road going from the idea to the product is rather a long one and it's a process that needs concentrated efforts. Doing this in the right way is a matter of teamwork.

We discussed almost everything in our talk with Design Manager Emre Bozbeyli about design culture at Paşabahçe's yesterday, today, tomorrow. In accordance with Atatürk's directive regarding the establishment and development of the glass industry in Turkey, Paşabahçe was established with its first glass facility in 1935. Today, we discussed the company's use of the state-of-the-art technology and R&D efforts in the glass sector from the very first day its foundation.

"Producing a new product and producing the right one is not limited to the strength of design. All of the brand, marketing, sales and marketing research departments have to work in harmony to provide the designing department with the right data and demand."

Which is important for you, functionality or visual appeal?

What is important here is to strike a balance without compromising design criteria. A non-functional product of course will not satisfy its user but it would not be right to create a product with no appeal just for the sake of functionality. The greatest problem in design is solving this equation. I define this as functionality that does not compromise visual quality.

What are the elements that distract you the most in design?

I can summarize this as everything that doesn't suit the nature of the product. Exorbitant details, unnecessary decoration, and various additions that do not directly benefit the user. No matter why or according to which trend the product is being used, these are elements that bring the product away from what it should actually be.

What do you think this season's styles and details will be like?

What will be determining design styles this season or, for that matter, design styles every season, is actually the social trends that influence people's lifestyles and push them into different routines. Today's changing living conditions and individualization cause people to be self-centered. And this leads them to using more personalized articles. This is our starting point in focusing on different products.

What do you think is the relationship between fashion and design?

As in other sectors, the steadily increasing complexity and inevitable development of fashion concepts and general trends today are determining factors in glass products as well. As in textiles, home decoration or in any other consumer good, we create form, color and design applications in glass that are in line with the current fashion. Looking at the design process, besides elements of creativity and aesthetic distinction, the most important step is bringing out a product with style, one that harmonizes with the trends, and doing this not too early, not too late, but just at the right time. Given the fact that the design process is so fast-moving and competition is inevitable, sometimes a product may reflect a trend that is not suitable for people's lifestyle or the style of the audience that the product is targeted for may sometimes have not reached a sufficient level of maturity to accept a particular trend. Because of this, creating the glass product at the right time is as important as creating the right design. As a result, Paşabahçe works with leading fashion agencies around the world, differentiating itself in this way in both the domestic and international markets.

DRINKWARE

BARDAKLAR VE KADEHLER

Art of Drinking

Bu kategoride standart bardak, kadeh ve sıcak içecek ürünlerimiz bulunmaktadır. Hem global, hem de yerel mutfakların alkollü ve alkolsüz içeceklerine yönelik farklı tarzlarda geliştirilmiş ürünler yer almaktadır. Bardaklar ve kadehler bölümune dahil olan "Sıcak İçecekler" konseptinde ise, çay ve kahve bardakları, kulplu bardaklar ve fincan setleri bir arada sunulmaktadır.

This category consists of standard tumblers, stemware and hot drinks items. The category contains distinctive items with different forms and styles, developed for the global and local alcoholic and non-alcoholic drinks. In the "Hot Drinks" concept; all the coffee mugs, tea glasses and cup & saucers are presented together.

Red, white

KIRMIZI ve BEYAZ

Üzümün fermantasyon işleminden geçirilmiş halidir şarap. Alkollü içkiler dünyasındaki en doğal seçenek, insanlık tarihinde de en uzun geçmiş sahip olanıdır. Toprağın, bağın, iklimin karşılıklı etkileşimi ve insan elinin üretimi ile birbirinden farklı çok sayıda şarap türü üretilir günümüzde. Bunların içerikleri, tüketim zamanları ve muhafaza yöntemleri küçük detaylarla ayrılsa da hemen hemen aynıdır. Tüm sene boyunca kırmızı, beyaz ve roze şarap çeşitlerini tüketebilirsiniz. Soğuk günlere oda sıcaklığında kırmızı şarabın, sıcak günlere ise soğuk beyaz ve roze şarapların yakıştığı bir gerçek. Fakat kendinizi sınırlamayın. Aslına bakarsanız olabilecek en güzel seçim, yöresinde üretilmiş ve tüketilme zamanı gelmiş şarabı yerinde içmek.

If defined simply, wine is fermented grapes. The most natural option in the world of alcoholic drinks is the one with the oldest relationship with humans. Today, many different wine types are produced with the human labor and the interaction of the soil, the vineyard, and the climate. Although there are some small details, the contents, consumption times and preservation methods of these wines are almost identical. Red, white and rosé wines can be consumed all year round. It is well-known that red wine at room temperature is the perfect companion on cold days while cold white and rosé wines suit to hot days. But don't limit yourself. As a matter of fact, the best practice is to drink the wine where it is produced when it is ready for consumption.

Şarap nasıl muhafaza edilir?

Şarap şişesi, içindeki şarap mantara degecek şekilde yatık olmalı.

Oda sıcaklığı orta derecede olmalı. Ortam ne sıcak, ne de soğuk olmamalı. 15-20 derece aralığında bir ısı en ideal ortamdır.

Şarabın saklandığı yer çok sert ve yoğun ışık almamalı.

Bölüm sürekli olarak havalandırılmalı.

Şarabın yeri sürekli olarak değiştirilmemeli ve sarsılmamalı.

How to store wine?

The wine bottle should lie flat so that the wine is in contact with the cork.

Room temperature should be moderate, neither hot nor cold. A temperature between 15-20°C provides the ideal environment.

The place where the wine is stored should not receive intense, harsh light.

The area should be continuously ventilated.

The wine should not be moved constantly and should not be shaken.

ŞARAP-KADEH EŞLEŞMELERİ

Kırmızı şaraplar büyük kadehlerde içilir. Büyük kadeh sayesinde şarabınız ihtiyacı olan havayı alır ve içim sırasında da bu tadi sonuna kadar alabilmenizi sağlar.

Beyaz ve roze şaraplar orta ve küçük kadehlerde içilir. Orta kısmında yine bir bombe vardır ama bu bombenin çapı daha dardır. Ağız ve bombe ölçüsü birbirine daha yakındır.

Köpüklü şaraplar ince, flüt kadehlerde servis edilir. Bu şekilde köpüklerin ve dolayısıyla şarabın aromasının etkisi artar. Bir diğer servis şekli de; kup da denilen yayvan kadehler. Bu kadehler servisin stiline göre flüt bardak yerine de tercih edilebilir. Köpüğü zayıf bir şarapta kup yerine flüt kadeh tercih edilmesi faydalı olur.

GLASS-WINE PAIRING

Red wines should be consumed in large glasses. The large glass allows the wine to get the necessary air and allows you to experience its taste until the last sip.

White and rosé wines should be served in mid-sized and small glasses. The bowl is still curved, but not broad as much as the red wine glass. The size of the bowl is closer to the size of the rim.

Sparkling wines are experienced best in fine, flutes, which increases the effect of the bubbles and thus of the aroma of the wine. According to the service style, sparkling wines can be also served in broad and shallow glasses, which are called "coupe". It is recommended to use a flute instead of a coupe for a wine with low amount of bubbles.

Genel itibarıyla, ağır yemeklerle gövdeli şaraplar, hafif yemeklerle de hafif şaraplar gider asında. Et ile Cabernet Sauvignon veya Merlot, hafif bir balık yemeğiyle yine hafif bir beyaz şarap olarak Riesling üzümü iyi gider.

In general, full-bodied wines are perfect for heavy dishes while light-body wines go with light dishes. For meat, prefer Cabernet Sauvignon or Merlot. Light fish dishes are delicious with light-body wines produced from Riesling grapes.

ŞARAP LEZZET EŞLEŞMELERİ

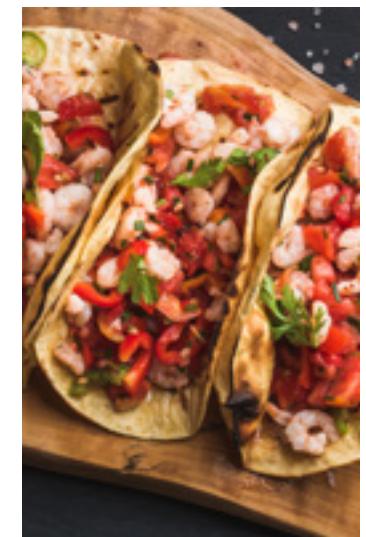

Taze sebzelerle taze bir Chardonnay tercih edilebilir.

Yağlı yemeklerle, tanenli, buruk şaraplar iyi bir eşleşme. Cabernet Sauvignon uygun olabilir.

Roze şarabı baharatlı yemeklerle tercih edin.

ŞARAP DÜNYASINDA SON GELİŞMELER

Şarap konusunda önmüze konulan neredeyse sonsuz sayıda seçenek, seçim konusunda ışımızı biraz zorlaştırmayı olabilir. Şarap; oldukça derin bir kültür, dünyadaki farklı coğrafya ve iklimlerde, farklı üzüm bağlarından doğan sayısız şarap türü ile harika bir lezzet dünyası. Günümüzde, klasik üretim ve sunum teknikleri oldukça gelişmiş ve değişmiş durumda. Şarap üretiminde organik, biyodinamik, doğal ve geleneksel şaraplar olarak adlandırılan türler nedir inceleyelim.

Organik Şarap

Üzüm bağlarında kimyasal ürünler kullanılmayan, muhafaza edilmesi için sülfür dioksit içermeyen ve organik kıstasları için standart onaylı şaraplarla verilen isimdir. Çabuk tüketimi çok daha uygun olacaktır.

Biyodinamik Şarap

Organik şarabı bir adım daha öteye taşırı. Biyodinamik şarap. Avusturyalı akademisyen ve filozof Rudolph Steiner'in bilim ve spiritielligi sentezleyen araştırmalarını baz alan bir şarap üretimidir bu. Toprağın ve bağların organik olması üstüne, yapılacak çalışmaların, aya, güneşe ve tüm gezegen hareketlerine göre düzenlenmesi ve doğal hayatı saygı duyan bir çalışma yürütülmesi mecburidir bu üretimde.

Doğal Şarap

En yaygın doğal şarap üretim türüdür bu. Doğal şarap, hemen hemen hiç kimyasal içerik olmadan, teknolojik anlamda manipüle edilmeden, daha butik yöntemlerle üretilir ve piyasaya sunulur.

Geleneksel Şarap

Geleneksel şarap, bildiğimiz piyasa şaraplarıdır. Uzun raf ömrü amaçlandığından kimyasal içeriklere de sahiptir bu şaraplar.

RECENT DEVELOPMENTS IN THE WORLD OF WINE-MAKING

An almost infinite number of wine choices makes it a little difficult for us to choose. Wine has created a very deep culture, and a world of delicious flavors with countless types of wine from different vineyards in different parts of the world. Nowadays, classical production and presentation methods are highly developed and changed. Let's examine how organic, biodynamic, natural and traditional wines are defined in wine production.

Organic Wine

It is the name given to wines which are produced from chemical product-free vineyards, which are stored without any sulfur dioxide, and which are approved for their organic criteria. Quick consumption will be much more appropriate.

Biodynamic Wine

Biodynamic wine carries organic wine one step further. This is a type of wine production based on researches by Austrian academician and philosopher Rudolph Steiner, who synthesizes science and spirituality. In addition to the organic nature of the soil and vineyards, biodynamic wine production requires the work to be carried out according to the movements of the sun, the moon and all the planets while respecting the natural life.

Natural Wine

This is the most common type of natural wine production. Natural wine is produced and marketed with almost no chemical content, without being technologically manipulated and by more boutique methods.

Traditional Wine

Well-known wines available on the market are classified as traditional wine. Since the shelf life is intended to be long, these wines contain chemical ingredients.

HISTORY OF BEER

Bugün dünyanın farklı farklı bölgelerinde birçok farklı türünü ürettiğimiz, keyifle içtiğimiz biranın tarihi çok eskilere dayanmaktadır. M.Ö. 10.000 yılında Mezopotamya'da insanlığın henüz avcı-toplayıcı dönemdeyken yabani arpayı keşfetmesi bira tarihinin başlangıcı kabul edilir. Arpa iki taşıın arasında öğütülüp suyla karıştırılıp besleyici bir içecek üretilenken arta kalan sıvı tesadüfi olarak mayalanarak kendiliğinden biraya dönüşmüştür. Bir nevi bira olan bu içecek çok beğenilerek günlük olarak tüketilmeye başlamıştır.

Sümerlerde, Hititlerde, Babillerde bira sıkılıkla tüketilen içecekler arasındadır. İlk yazılı kanun olan Hammurabi Kanunları'nda bira ile ilgili hükümler vardır ve Babillerde reçine, karanfil gibi farklı tatlandırıcılarla 20 çeşit bira üretildiği bilinir.

Zaman içerisinde bira Eski Mısır'a, oradan da Orta Çağ'da Avrupa'ya gelmiştir. Avrupa'da büyük şehirlerin kirli suyundan kaynaklanan tifo ve kolera gibi salgın hastalıkların yaygınlaşması ile hastalık taşımayan biranın popülerliği hızla artmıştır. Aynı dönemde manastırda rahipler toplu bira üretimine başlamış ve bira halkın gündelik içeceği haline gelmiştir. Sanayi devrimi ve teknolojinin gelişmesi ile bira günümüzdeki modern halini almıştır.

Biranın raf ömrü kazanması ise Louis Pasteur'ün maya üzerindeki çalışmaları sayesinde pastörize edilmesiyle olmuştur. Ayrıca Pasteur bira mayasını izole ederek biranın standartize edilmesine katkıda bulunmuştur. 1980'lerde büyük üreticilerin pazardaki hakimiyetine karşı küçük ölçekte çok farklı biralar üreten craft bira üreticileri ortaya çıkmaya başlamıştır. Bugün craft bira üreticileri sayesinde çeşitlilik artmaya devam etmektedir.

Bira kültürü şarap ve viski kültürleri gibi oldukça gelişmiştir. Bira uzmanları, günümüzde toplamda 140 türden doğan 40.000 çeşit bira olduğunu tespit etmiştir.

BİRA TARİHİ

The history of beer, which is produced in various types in many different parts of the world and which we all enjoy drinking, dates back to ancient times. It is deemed to start with the discovery of wild barley in 10,000 BC in Mesopotamia during the early hunting-gathering times. While barley used to be ground between two stones and a nutritious beverage was produced, the remaining fluid which fermented accidentally turned into beer on its own. This beverage, which is a kind of beer, was found delicious and then started to be consumed every day.

Beer was one of the most favorite drinks among Sumerians, Hittites and Babylonians. The Hammurabi Code, which is oldest recorded code of law, contains provisions on beer, and it is known that Babylonians used to produce 20 types of beer using different flavoring agents such as resin and cloves.

In time, beer has first moved to ancient Egypt and then to Europe in medieval times. With the spread of epidemics such as typhoid and cholera caused by the pollution of water in growing European cities, beer was increasingly becoming popular as it did not catch the disease.

In the same period, priests started brewing beer in monasteries, and beer has soon become an everyday drink for the people. With the industrial revolution and technological development, beer has found its modern form.

The shelf life of beer was improved with the pasteurization process, which was the result of the studies on fermentation by Louis Pasteur. Louis Pasteur also isolated a pure strain of yeast for beer, and contributed to the standardization of beer. Craft beer producers started to pop in 1980s, which produced numerous types of beer on a small-scale, competing with large producers in the market. Today, diversity continues to grow thanks to the craft beer producers.

Beer culture is highly developed just like wine and whiskey cultures. Beer experts have identified total 140 types and 40,000 varieties of beer as of today.

Bira İçim Teknikleri

Eğer servisi ve sunumunda aksi söylenmiyorsa, genel olarak bira, soğuk içilmesi gereken bir içecek.

Fıçı bira ile şişe bira arasında, pastörizasyon miktarı farkı vardır. Şişelenmiş bira daha uzun raf ömrü elde etmek için daha fazla pastörize edilmiştir. Lezzetleri arasında fark olduğu kesin. Fakat biri diğerinden daha lezzetli diye bahsetmek mümkün değil. Bu bir tercih meselesiştir.

Tercih meselesi olmayan bir şey vardır ki; bira fıçı ya da şişe farketmeksızın, bardaktan içilmelidir. Bu şekilde köpüğü doğru ayarlanabilir ve lezzeti daha doğru şekilde alınır.

Bira çeşitleri üçe ayrılır; Ale, Lager ve karışım Hibrit biralardır.

How to Drink Beer

If it is not stated otherwise during service and presentation, beer in general is a drink which should be consumed cold.

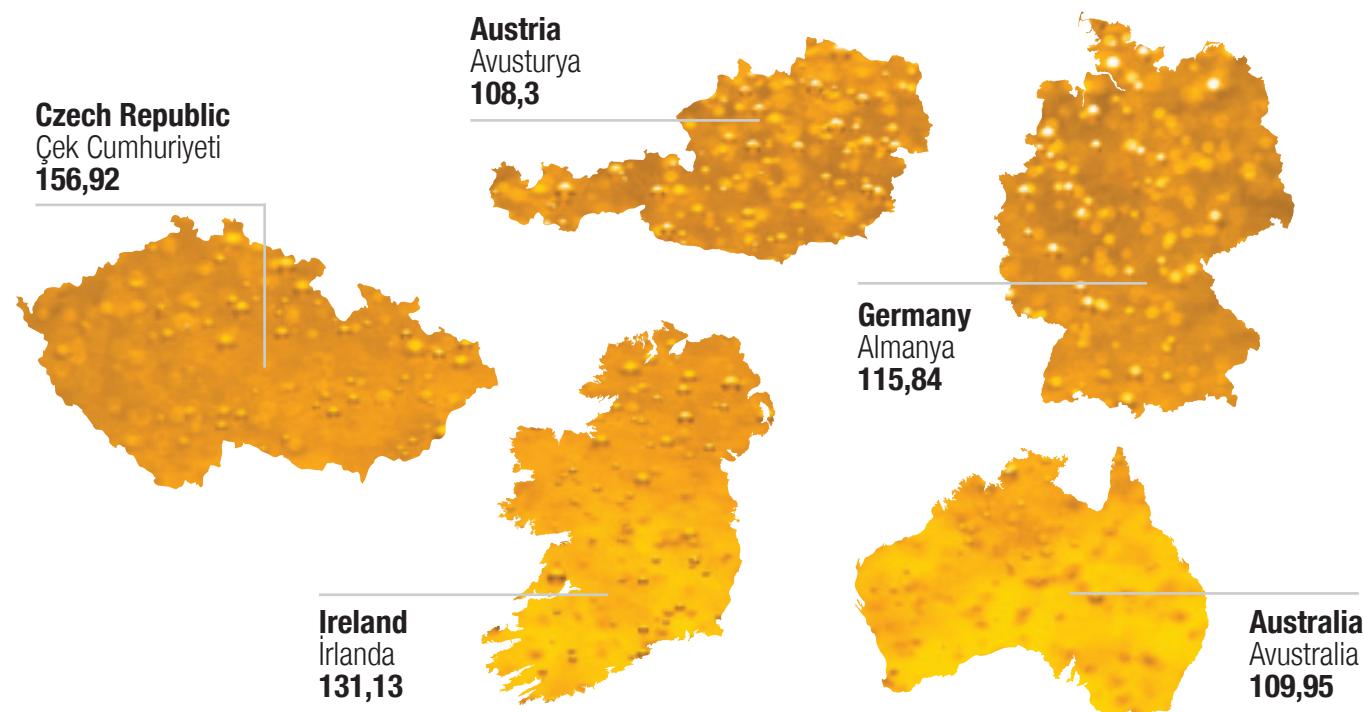

There is a difference in the amount of pasteurization between draft beer and bottled beer. Bottled beer is more pasteurized to achieve a longer shelf life. However, it is without question that there is a difference between their tastes. Although it is not possible to say one tastes better than the other. This is a matter of preference.

There is something which is not a matter of preference; beer should be drunk from a glass, regardless of whether it is poured out of a keg or bottle. In this way the foam can be adjusted correctly and the flavor is delivered more accurately.

There are three beer types: Ale, Lager, and blended Hybrid beers

Kişi başı yıllık bira tüketimi (litre)

Annual consumption of beer per capita (liter)

Miksoloji tekniklerini evde uygulamak hiç de zor değil. Evde sağlıklı içecek karışımı hazırlamak, sık bardaklarda doğal lezzetlerin keyfini sürmek istiyorsanız, hayal gücünüzden faydalanan ve mutfaka biraz zaman geçirin. Kendinize özel bir reçete hazırlarken, sağlıklı ve doğal malzemeler kullanın ama sevdığınız, tüketmek istediğiniz tatlara mutlaka öncelik verin. Kokteyl karışımı da yemekler gibi özel reçetelerle belli lezzetler ve sağlıklı içerikler sunmak amacıyla yapılır. Bu kokteyl karışımı her zaman alkol içermeyebilir. Alkolsüz, oldukça lezzetli bu karışımlara Mocktail denilir. Son yıllarda yükselen sağlıklı beslenme alışkanlıklarıyla birlikte büyük bir trend haline gelen alkolsüz karışımlar, alkollü karışımlardan çok daha farklı çeşitli alternatiflere sahip. Üstelik içerikleri de çoğu zaman sizin yaratıcılığınızza kalmış.

Mixology

Ebegümeci soğuk çay

1/2 su bardağı kuru ebegümeci
1 tarçın çubuğu
4 su bardağı soğuk su
1/4 su bardağı aromasız şurup ya da şekerli su

Büyük bir kavanoza ebegümeci ve tarçın çubuğunu koyun. Üzerinde su ekleyin. Kapağını kapatarak en az sekiz saat buzdolabında bekletin. Dolaptan aldıktan sonra süzerek şurubu ekleyin.

Soğuk sıkım meye suyu da bir başka sağlıklı alternatif. Bıçaksız olarak sebze veya meyveleri çiğnayarak ve ezmek suretiyle suları elde edilir. Bu sistemde meye ve sebzelerin hücresel yapıları aynen korunur, oksidasyon ve ayrılma önlenerek enzimlerin ve besinlerin doğal formlarına yakın bir şekilde kalması sağlanır. Bu yöntemle elde edilen suların tatları daha lezzetli ve çok daha faydalıdır.

Bademli süt kokteyli

2 yemek kaşığı kavrulmuş badem
1 su bardağı süt
1 çay kaşığı vanilya
1/2 çay kaşığı tarçın

Kavrulmuş bademleri mutfak robotunda toz hale getirin. Süt ve vanilyayı ekledikten sonra karıştırın. Servis bardaklarına aldığıınız kokteyllerin üzerine tarçın serpin ve servis edin.

1/4 glass of aroma-free syrup or sugared water.

Put the hibiscus and cinnamon stick in a large jar. Add water. Close the lid and refrigerate for at least eight hours. Remove from the refrigerator, strain the mix and add syrup.

Cold pressed fruit juice is another healthy alternative. Without using any knife, juice is obtained by squeezing or crushing vegetables or fruits. In this system, the cellular structures of fruits and vegetables are protected. By preventing oxidation and separation, enzymes and nutrients are kept close to their natural forms. The taste of juices obtained by this method are more delicious and much more useful.

Turkish coffee

Türk kahvesi

İlk çıkışı 10. Yüzyılda bir Arap doktorun keşfiyle olduğu düşündürülen kahve üzerine yapılan pek çok araştırma kahvenin bir Arap Yarımadası ürünü olduğunu gösterir. Yemen'den Mekke ve Medina'ye ve oradan da 5 yüzyıl sonra İran, Mısır, Anadolu ve Avrupa'ya gitmiştir. Osmanlı, kahve ile tanışlığında o kadar sever ki, saraya bir kahvecibaşı tahlis edildiği söylenir.

Sarayda esen bu rüzgâr tabii hizlîca halkın arasında da gündeme oturur ve ilk örnekleri Tahkale'de açılan kahvehaneler, hizlîca tüm şehrde yayılırken her geçen gün daha çok insan kahve sevdalısı haline gelir. Hatta öyle büyük değişim yaşanır ki kahve sayesinde, kahvehaneler, sosyokültürel anlamda insanların kendini geliştirdiği, bir araya gelip paylaşmalarla bulunduğu mekânlarla dönüşür.

A good number of researches show that coffee, which is thought to be first discovered by an Arabic physician in the 10th century, is native to the Arabian Peninsula. Coffee traveled from Yemen to Mecca and Medina, and five centuries later to Iran, Egypt, Anatolia and Europe. The Ottomans love coffee so much that a chief coffee maker (kahvecibâsi in Turkish) is said to be appointed to the palace.

People got the share of this new movement in the palace. The first coffee houses were opened in Tahtakale, İstanbul, with the number exponentially increasing and new coffee houses being opened throughout the city. Coffee triggered such a change in the public that coffee houses became places where people came and develop themselves through reading and sharing knowledge.

The Ottomans develop a new type of coffee by grinding roasted coffee beans in mortars, then brewing the ground coffee in cezves: Turkish Coffee. This new type of coffee with its new taste was also admired in Europe.

The story of Turkish coffee in Europe is quite interesting. In the mid 17th century, when the relations between Ottomans and French deteriorated, the Padishah sent a lowrank officer to visit Louis XIV, the Sun King. The officer Mütefferika Süleyman Ağa started a new movement called "Turquerie" in Paris, which resulted in the adoption of Turkish Coffee by the French.

Üçüncü jenerasyon kahveden sonra neler oluyor?

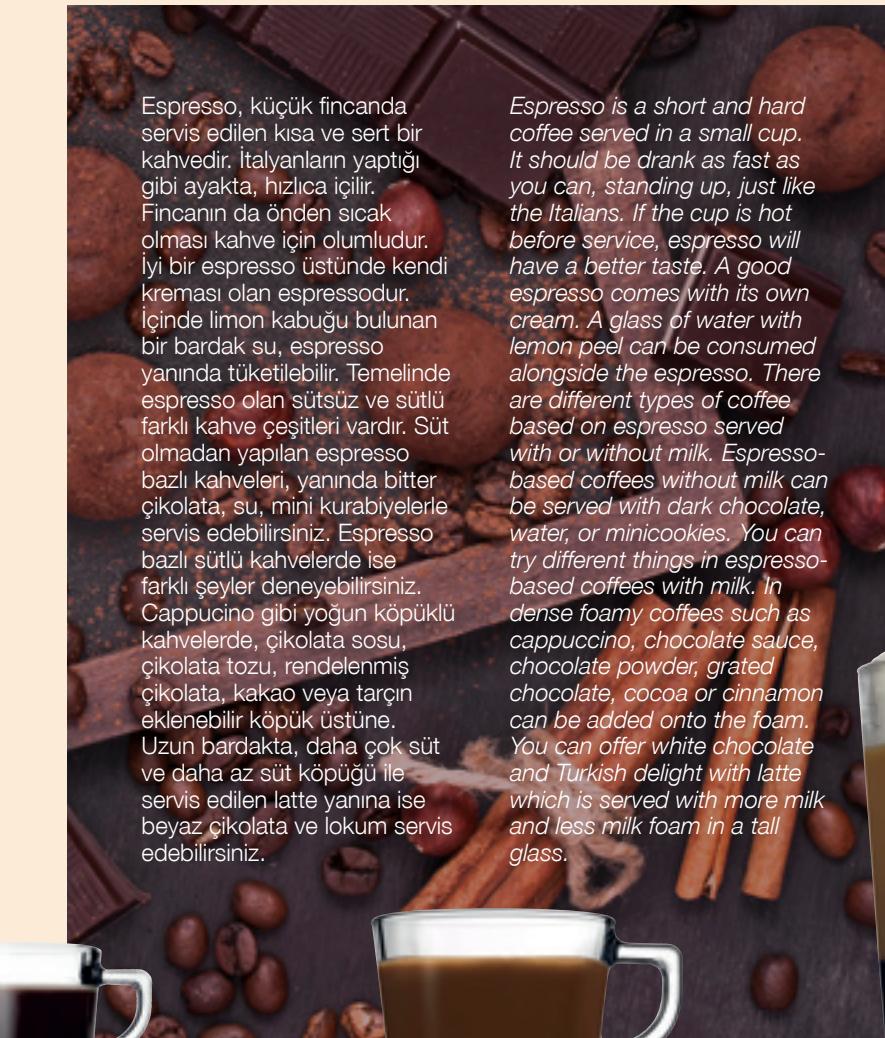

Artızan tavır ve aşkla hareket eden üçüncü jenerasyon kahve akımı, hala popülerliğini korurken kendini geliştirdi ve onu dördüncü jenerasyon takip etti. Dördüncü jenerasyon kahve artızan tavra daha fazla araştırma, deney ve bilim ekledi, kahveler teknik olarak çok daha detaylı bir hale büründü. Şimdi de ise moleküler kahvecilikten bahsedilen bir beşinci jenerasyon konuşuluyor. Kahve konusunda uzay çağına geçiş yapmamız olası gözüküyor.

What to expect after the third wave of coffee?

The artisanal third wave of coffee developed itself and maintained its popularity, then left the stage to the fourth wave, which added more research, experiment, science to the third wave, making coffees technically much more detailed. Now, everybody talks about a fifth wave of coffee, which is expected to bring molecular coffee brewing. It seems likely that space age of coffee awaits us.

KAHVE SUNUMLARI PRESENTATION of COFFEE

Espresso, küçük fincanda servis edilen kısa ve sert bir kahvedir. İtalyanların yaptığı gibi ayakta, hızla içilir. Fincanın da önden sıcak olması kahve için olumludur. İyi bir espresso üstünde kendi kreması olan espressodur. İçinde limon kabuğu bulunan bir bardak su, espresso yanında tüketilebilir. Temelinde espresso olan sütsüz ve sütlü farklı kahve çeşitleri vardır. Süt olmadan yapılan espresso bazlı kahveleri, yanında bitter çikolata, su, mini kurabiyeyle servis edebilirsiniz. Espresso bazlı sütlü kahvelerde ise farklı şeyler deneyebilirsiniz. Cappuccino gibi yoğun köpülü kahvelerde, çikolata sosu, çikolata tozu, rendelenmiş çikolata, kakao veya tarçın eklenebilir köpük üzerine. Uzun bardakta, daha çok süt ve daha az süt köpüğü ile servis edilen latte yanına ise beyaz çikolata ve lokum servis edebilirsiniz.

Espresso is a short and hard coffee served in a small cup. It should be drank as fast as you can, standing up, just like the Italians. If the cup is hot before service, espresso will have a better taste. A good espresso comes with its own cream. A glass of water with lemon peel can be consumed alongside the espresso. There are different types of coffee based on espresso served with or without milk. Espresso-based coffees without milk can be served with dark chocolate, water, or minicookies. You can try different things in espresso-based coffees with milk. In dense foamy coffees such as cappuccino, chocolate sauce, chocolate powder, grated chocolate, cocoa or cinnamon can be added onto the foam. You can offer white chocolate and Turkish delight with latte which is served with more milk and less milk foam in a tall glass.

Kahve; yoğun kokusu, aroması ve keyif uyandıran lezzetile vazgeçilmez bir tutku...

Her yudumuyla içimizi ısıtan iyi bir kahve; en iyi çekirdeklerin yetiştilirip toplanmasından, kavrulup öğütülmesine ve demlenip servis edilmesine uzanan emek, uzmanlık ve aşk dolu bir yolculuğun sonrasında bizimle buluşuyor.

Verdiği keyif ortak olsa da her kahvenin kökenine has bir tadı, kavrulma süreci ve demlenme yöntemine göre farklı acılık oranları var. Bu acılık demlemede kullanılan su miktarı, süt ve şeker gibi unsurlarla azaltılıp artırılabilir. Bu nedenle kahvenin koyulduğu fincanın hacmi ve formu; kahvenin kokusu, tadı açısından büyük önem taşıyor.

İyi kahve iyi bardakta içildiğinde, kahvenin aromasına, tadına, kokusuna ve acılığına uygun doğru fincan kullanıldığında içim keyfi doruğa ulaşıyor.

KÜÇÜK FİNCANLAR

Kahvenin tadını belirgin ve yoğun şekilde hissettiren sıkı kahveler, diğer kahvelere göre daha az su ile demlenirler. Bu nedenle espresso, Türk kahvesi ve ristretto gibi kahve türleri küçük fincan veya bardaklarla servis edilirler.

Türk Kahvesi

Türk kahvesinde genel olarak "arabica" türü kahveler tercih edilir veya birçok farklı yörenin gelen kahvelerin harmanı kullanılabilir. Kahve çekirdeklere tüm diğer kahvelerden daha ince çekilir ve geleneksel olarak pırıltı el değirmeni kullanılır. Diğer kahvelerden farklı olarak soğuk su, cezvede kahve ile beraber istirilerek demlenir ve telvesi ile beraber servis edilir. Üzerinde kremansı bir köpük tabakasının bulunmasına dikkat edilir. Kremansı rengi kahvenin ne kadar doğru demlendiğinin bir göstergesidir. Doğru krema altın sarısı renkte olup tüm fincanın bulunmasına dikkat edilir.

Kahvenin aroması ve kokusu yoğun ve tok olarak hissedilir.

Espresso

Türk kahvesinden sonra en ince çekilmiş bu kahvenin bütün aroması ve özü yüksek basınçla sıcak su yardımıyla sökülür, yoğunlaşmış şekilde küçük ölçülerde fincanlara aktarılır. Bu nedenle Espresso hazırlanırken "shot" kelimesi kullanılır. Single Shot ya da Single Espresso yaklaşık olarak 30 ml'dir. Diğer kahvelerden farklı olarak soğuk su, cezvede kahve ile beraber istirilerek demlenir ve telvesi ile beraber servis edilir. Üzerinde kremansı bir köpük tabakasının bulunmasına dikkat edilir. Kremansı rengi kahvenin ne kadar doğru demlendiğinin bir göstergesidir. Doğru krema altın sarısı renkte olup tüm fincanın bulunmasına dikkat edilir.

Ristretto

Espresso'nun kısa çekilmiş haline verilen ismidir. Aynı miktardaki kahve daha az su kullanılarak espresso ile aynı yöntemle hazırlanır, yaklaşık 22 ml'lik bir kahve elde edilir. Kahve tadını en yoğun şekilde hissettiren ristretto en kısa içilen kahvelerden biridir. Üzerinde kremansı bir köpük tabakasının bulunmasına dikkat edilir.

SMALL CUPS

Thick coffees which make you feel the distinct taste of coffee are brewed using less water compared to other coffees. Thus, coffee types such as espresso, Turkish coffee or ristretto are served in small cups or glasses.

Turkish Coffee

In general, "Arabica" coffee beans are preferred for Turkish coffee, or coffee blends from various regions may be used. Coffee beans are ground more finely than all the other coffees, and traditionally brass coffee grinders are used. Unlike other coffee types, cold water is heated in a coffee pot together with coffee, and coffee is brewed. It is served together with its grounds. It has dense foam on the top, and the grounds are allowed to sink before the coffee is drunk. You can feel the intense and saturated aroma and smell of the coffee.

Espresso

Ristretto is the term used for the very short shot of espresso. The same amount of coffee is brewed with the same espresso method, but with less water. The shot produced is approximately 22 ml. It is one of the most concentrated forms of coffee, making you feel the coffee taste at a maximum. It is paid attention to leave creamy foam on the top.

DUBLE FİNCANLAR

Kahve ne kadar sıkı olsa da kahve tutkunlarına bazen tek shot yetmez. Double kahveler aynı yoğunlukta kahve lezzetini daha uzun süreyle yaşatır. Buna uygun olarak double espresso ve double macchiato daha büyük bardak ve fincanlarda sunulur.

Duble Espresso

60 ml'lik Espresso'dur. Burada kullanılan su miktarına paralel olarak kahve miktarı da iki kat fazla olur. Servis edilirken şeker ile lezzetlendirilebilir. Süt ilave edilmez. Üzerinde kremansı bir köpük tabakasının bulunmasına dikkat edilir.

Macchiato

Bazı yerlerde karamelle veya çikolata ile servis edilen kahvelerin ismi olarak kullanılmaya başlanılsa da, aslında çok daha farklı ve basit hazırlanan bir kahvedir. Espresso'nun üzerinde süt köpüğü ile servis edilmiş halidir. Espresso'nun tadını çok az yumusatmak istediğinde tercih edilir.

ORTA BOY FİNCANLAR

Kahveyi gevsetmenin en yaygın yolu bol su kullanımlıdır. Kahve hazırlarken su oranını yüksek tutmak daha gevşek ve kolay içimli bir kahve elde etmeye yarayacaktır. Kahveyi lezzetlendirmek ve daha yumuşak bir tada ulaşmak için süt de tercih edilebilir. Sütün içindeki yağ kahvenin buruk tadını dengeleyecektir. Bu tür kahveler orta boy fincanlarda servis edilir.

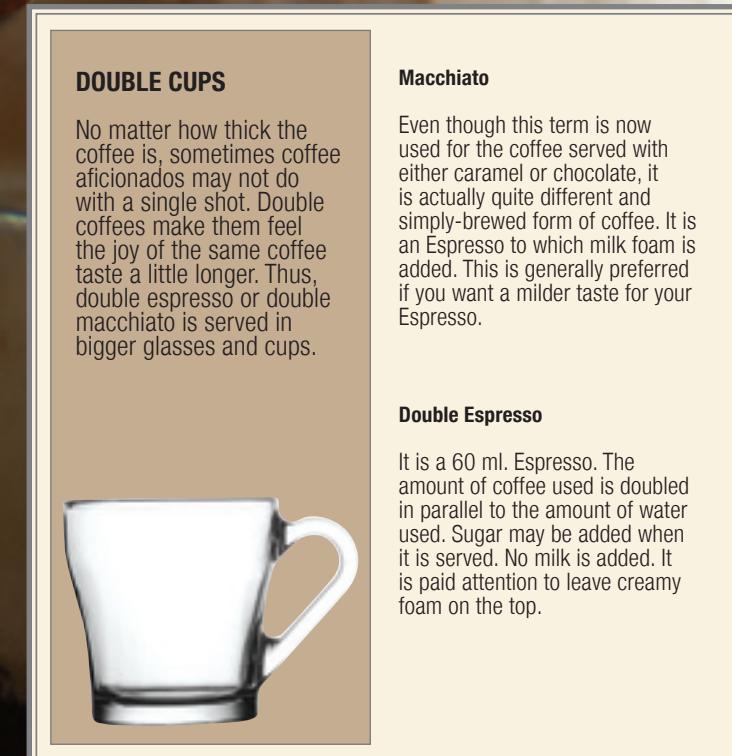

Cappuccino

İsmi "Capuchin" rahiplerinin elbiselerinin rengine benzer renginden alır. Çok basitçe, 60 ml espresso'nun sıcak süt ve süt köpüğü ile servis edilmesidir. Her zaman bol köpükle servis edilmesi gerekmek. Kahveyi acı bulan kişiler tarafından tercih edilebilir. Süt ve süt köpüğü sayesinde kahve, daha yumuşak bir lezzete kavuşur.

Caffè Crema

Uzunca çekilmiş bir Espresso'ya Kuzey İtalya ve İsviçre'de verilen ismidir.

DOUBLE CUPS

No matter how thick the coffee is, sometimes coffee aficionados may not do with a single shot. Double coffees make them feel the joy of the same coffee taste a little longer. Thus, double espresso or double macchiato is served in bigger glasses and cups.

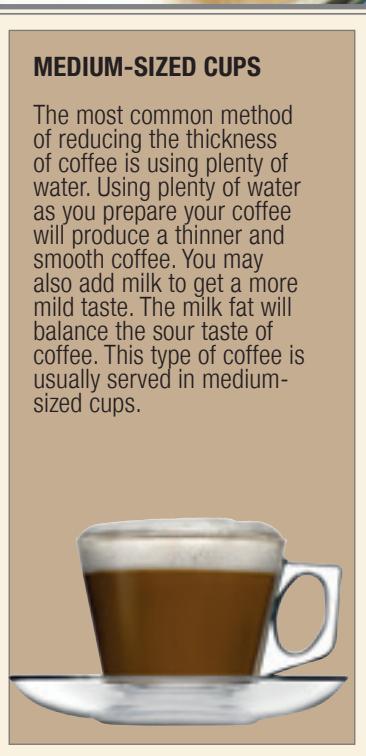

Macchiato

Even though this term is now used for the coffee served with either caramel or chocolate, it is actually quite different and simply-brewed form of coffee. It is an Espresso to which milk foam is added. This is generally preferred if you want a milder taste for your Espresso.

Double Espresso

It is a 60 ml. Espresso. The amount of coffee used is doubled in parallel to the amount of water used. Sugar may be added when it is served. No milk is added. It is paid attention to leave creamy foam on the top.

MEDIUM-SIZED CUPS

The most common method of reducing the thickness of coffee is using plenty of water. Using plenty of water as you prepare your coffee will produce a thinner and smooth coffee. You may also add milk to get a more mild taste. The milk fat will balance the sour taste of coffee. This type of coffee is usually served in medium-sized cups.

Cappuccino

Cappuccino takes its name after the color of the clothes of "Capuchin" priests. It is simply 60 ml. espresso served with hot milk and milk foam. It does not need to be served with a thick foam each time. It may also be preferred for those who find the coffee "bitter". Milk and milk foam are what give this coffee type a milder taste.

Caffè Crema

It is the name given to a long shot of espresso in Northern Italy and Switzerland.

UZUN FİNCANLAR

Bazı kahve tutkunları için sütün tadının daha yoğun hissedilmesi önemlidir. Bu durumda daha yoğun süt ile yapılan kahve türleri tercih edilebilir. Soğuk kahveler ise özellikle yaz aylarında kahveden vazgeçmek istemeyenlerin yardımına yetişir. Hem soğuk kahveler hem de yoğun süt kullanılarak yapılan kahveler uzun fincan ve bardaklarda içiliyor.

KUPALAR

Kupalar; kahve servisinde yoğun olarak kullanılırlar. Gerek gevşek kahveler, gerekse su veya sütle lezzetlendirilmiş kahveler kupalar ile servis edilebilir.

Americano

60 ml espresso üzerine 120 ml sıcak su eklenerek servis edilir. Böylece espressoya göre çok daha gevşek ve kolay içimli bir kahve elde edilir. Servis edilirken şeker ile lezzetlendirilebilir. Süt ilave edilmez. Üzerinde çok hafif altın renkte ince kremamsı bir tabaka bulunur.

Frappé Kahve

Frappé, Yunanistan'da ortaya çıkan ve yaygın olarak tüketilen soğuk kahve çeşididir. Shaker veya Frappé makinesi yardımı ile hazırlanır. 2 kahve kaşığı hazır kahve, şeker, yaklaşık 100 ml su ile köpürtülerek karıştırılır ve bu karıştırma işlemi sonunda bol köpük ortaya çıkar. Bol buzlu uzun bardaklarda pipet ile servis edilir. İsteğe göre süt de eklenebilir.

Cafe Latte

Kahveden çok sütün tadının yoğun hissedildiği bir kahve türüdür. 60 ml Espresso ya yaklaşı 180-300 ml sıcak süt eklenerek yapılır. Yumuşak bir tada sahiptir.

Irish Coffee

İçkiye düşkünlüğüyle bilinen İrlandalılar kahveye lezzet katmak için farklı bir yöntem döşündüler: Viski. Irish Coffee; kahve, şeker ve viski karıştırılmış üzerine çırpılmış krema eklenerek yapılır. Genel olarak uzun ve kulplu fincanlarda servis edilir.

LONG CUPS

For some coffee aficionados, it is important to feel the taste of milk a bit more. In this case, they can prefer the coffee types where much more milk is used. Ice coffee is indispensable for those who do not want to stop drinking coffee during summer months. Both ice coffees and the coffees served with lots of milk are drunk from long cups and glasses.

Frappé

Frappé coffee is a popular iced-coffee drink, which has its origin in Greece. It is prepared with a Shaker or Frappé machine. 2 coffee spoons of instant coffee are mixed with sugar and around 100 ml water until a solid foam forms on the surface. It is served on the rocks with a straw. You may add milk if desired.

Cafe Latte

It is a type of coffee which makes you feel the taste of milk more than coffee. Around 180-300 ml hot milk is added to 60 ml espresso. It has a mild taste.

Irish Coffee

Known for their passion for alcohol, the Irish found a new way to add taste to coffee: whiskey. Irish Coffee is made by mixing coffee, sugar and whiskey and adding whipped cream to the mixture. It is generally served in long and handled mugs.

Filtre Kahve

"French Press" bir kahve türü değil, kahveyi demleme şekline verilen ismidir. Bu yöntemde mutlaka orta kalınlıkta çekilmiş kahve çekirdeklere kullanılır. Kahve çekirdeklere kavrulma seviyesi ve köken açısından kişisel zevke göre farklılık gösterebilir. Kaynama derecesine yakın seviyede isınan su, filtreye konulan kahvenin içinden süzülerek, kahvenin aroması ve tadını kibarca söker ve damla damla kahve potuna dökülür.

Cold Brew

Cold Brew yani soğuk demleme, isminden de anlaşıldığı üzere kahvenin hiç ısıl işlemden geçirilmeden yaklaşık 12 saat boyunca soğuk suda, yavaşça demlenerek hazırladığı yönteme verilen ismidir. Bu sayede kullanılan kahvenin kökeninden ve türünden gelen aromalar ortaya çıkar. Bu servis için kahve çekirdeği ince çekilir. Servis edilirken de isteğe göre buz ile veya süt ile karıştırılabilir.

French Press

"French Press" bir kahve türü değil, kahveye kiyasla, kahvenin tadı daha yoğun bir şekilde alınır. Camdan yapılmış kulplu servis kabının içinefiltre kahveye göre daha kalın çekilmiş kahve çekirdeği ile kaynamaya yakın sıcak su konulur. Kahve demlendiğinden sonra kabın tepesindeki süzgeçli metal piston yavaşça aşağı itilerek telve bloke edilir. Kahvenin açılmasını önlemek için kahvenin uzun süre French Press'te bekletilmemesi gereklidir.

Cafe au Lait

Cafe Au Lait, özellikle Avrupa'da sıkça karşılaşılan bir kahve türüdür. Temelinde bolca sıcak süt kullanılır. Sicak süt, espresso ile veya french press kahve ile karıştırılır. Avrupa'da, özellikle Fransa'da Café Au Lait, fincan yerine genelde büyük kaselerde servis edilir.

MUGS

Mugs are used often when serving coffee. Both thin coffee types and those to which water or milk is added may be served in mugs.

Americano

60 ml espresso üzerine 120 ml sıcak su eklenerek servis edilir. Böylece espressoya göre çok daha gevşek ve kolay içimli bir kahve elde edilir. Servis edilirken şeker ile lezzetlendirilebilir. Süt ilave edilmez. Üzerinde çok hafif altın renkte ince kremamsı bir tabaka bulunur.

Americano

60 ml espresso is served after 120 ml hot water is added. Thus, you can get a lot thinner and smooth coffee compared to espresso. Sugar may be added when it is served. No milk is added. It has a very thin creamy golden layer on the top.

Filter Coffee

It is the term for a specific method of coffee preparation. Medium-ground beans are used for this brewing method. The roasting level and the origin of coffee beans may be chosen as desired. The water heated almost to boiling point runs through the coffee powder in the filter with a slow drop-by-drop dripping process, producing the aroma and taste of fresh filter coffee.

Cold Brew

Cold Brew - as its name implies - is the method of slowly brewing coffee in cold water for almost 12 hours without any heating process involved. This is how the noticeable aroma owed to the type and origin of the particular coffee is revealed. Coffee beans are ground finely for this method. You may add ice or milk when you serve it.

Cafe Au Lait

Cafe Au Lait is a coffee type that is very common particularly in Europe. Plenty of hot milk is used as its basis. Then hot milk is mixed with either espresso or French Press coffee. Café Au Lait is served in large bowls rather cups in Europe and especially in France.

Türkiye'de çay denildiğinde aklan gelen ilk görüntü; İncebelli ve pek tabii bu şahsına münhasır tasarımla birlikte de Paşabahçe... Çay o bardakta içilince tadi bir başka. Çay kültürünün simgesi, çaya şeklini veren efsane tasarım... İncecil cidarlı camdan üretilmiş, kulpsuz, bel kısmında daralan, zarif bir kadın vücudunu andıran bu tasarım zamanı aşıyor, hem klasik hem her dönem yorumlanan bir ikon olarak çay kültüründe geçmişten geleceğe bir köprü kuruyor. Peki bu tasarım nasıl oluştu? Bu forma nasıl büründü ve köken nedir?

Tasarımın hikâyesi Osmanlı dönemine kadar uzanıyor. Araştırmalar, topraklarımıza incebelli cam bardağın kullanımının 19. Yüzyılın son çeyreğine denk geldiğini işaret ediyor. Le Corbusier 1911 yılında Doğu'ya yaptığı seyahate dair izlenimlerini anlattığı Şark Seyahati kitabında "kahvenin kulpsuz fincanda, çayın ise armut gibi kıvrımlı bardaklarda" içildiğini belirtiyor. Bu dönemde, Osmanlı'da batılılaşma ve çağdaşlaşma döneminin hız kazandığı bir dönem olarak öne çıkmıyor. Çay Osmanlı'da 18. yüzyılda tıbbi amaçlarla kullanılırken 19. yüzyılın sonrasında batılışmanın etkisiyle gündelik yaşama bir keyif içeceğine de incebellinin bu dönemde ortaya çıktığı fikri güçlendiriyor. Çay ithalatının artışı, kahvaltı kültürünün ve geleneğinin oluşmaya başladığı bu dönemin belgesel ressimi Hoca Ali Rıza imzalı 1900 yılına ait resim albümündeki 'semaver, demlik ve çay bardağı' deseninde, cam olduğu algılanan ince belli formdaki bardak dikkat çekiyor.

1935 yılında Paşabahçe'nin kurulmasıyla incebelli çay bardağını üretimi ve yayılması da hız kazanıyor. Herkesin ulaşabileceği bir içeceğe dönüşen çay, herkesin ulaşabileceği incebelli bardakta topluluğu birleştirip bütünlüğe bir ortak nokta haline getiriyor. Cumhuriyet Türkiye'sinin ikram geleneğinde; çay ikramı sadelik, tevazu, konukseverlik, samimiyet, yardımseverlik, paylaşma, zevk, zarafet, duygusallık, nezaket, sefa gibi hisleri kapsayan bir iletişim biçimini olarak anlam kazanıyor ve incebelli cam çay bardağı bu anlamda güçlendiriyor.

Incebelli bardağın bu kadar benimsenip sevilmesinin altında birkaç önemli neden yatar. Incebellinin çayı soğutmaması ve çaydan alınan lezzeti artırması bu nedenlerin başında geliyor. Camın çayın rengini gösterecek şekilde pürüzsüz, parlak ve şeffaf olması, çayın kokusunu ve tadını bozmaması da önemli diğer etkenler arasında yer alıyor.

Incebellinin bugünkü formuna nasıl ulaştığı konusunda birbirinden farklı birkaç sav öne sürülmüyor. Camın kullanımı özellikle Rusya ve İran gibi Osmanlı'nın komşularının etkisiyle ortaya çıkılmış olsa da, bu camın incebelli formunun verilmesinde Osmanlı'nın simgelerinden laleni etkisinin olduğu bu savlardan biri. Incebelli şeklen laleyi animsatıyor ve lale çiçeğinin gövdesi büyülüüğünde üretiliyor.

Türkiye'de "çaya şeklini veren", Paşabahçe ile her eve giren ve ikonlaşan İncebelli, beş duyuya hitap ederek çay içimini keyfe dönüştirmeye devam ediyor. Rengi olmayan şeffaf bir malzemeden üretildiği için çayın gerçek kırmızı rengini sergiliyor, cam kokusuz ve tadi olmayan bir malzeme olduğu için yalnızca çayın kendine has kokusunu ve tadını ortaya çıkarmıyor, küçük ebatlı ve kıvrımlı siluetiyle iki parmakla, rahat olduğu kadar güvenle kavranıyor ve sıcak çayın ısısını hissettirerek adeta çay içmeye davetiye çıkartıyor.

INCEBELLİ

SLIM-WAIST

Slim-waist: The first glass that comes to mind if you are to drink tea in Turkey is the legendary design representing the tea culture. This timeless handleless design is made of glass with a low wall-thickness, narrows down at the center and reminds of a beautiful female body. It creates a bridge between the past and future in the tea culture as a classic icon that is reinvented from time to time. Okay, but how has this design evolved through time and taken its current form? What is its origin?

The history of slim-waist tea glass dates back to the Ottoman Empire. The researches reveal that the slim-waist tea glass was first seen in this geography by the last quarter of the 19th century. In his book "Journey to the East" in which Le Corbusier tells about his impressions of his journey to the East in 1911, the author says "coffee is drunk from a handleless cup, while tea is drunk from curvy glasses in the shape of a pear". This period is characterized with a high level of westernization and modernization in the Ottoman Empire. While tea was used for medical purposes during the 18th century in the Ottoman Empire, it turned into a daily beverage by the end of the 19th century thanks to the westernization process. This supports the idea that the "slim-waist" glass was started to be used during this period. In the paintings album of 1900 by Hoca Ali Rıza, the documentary painter of the period in which tea imports increased and a breakfast culture and tradition started to be established, the "slim-waist" form of glass, that is seen to have been made of glass, draws attention in the "Samovar, Teapot and Tea Glass" painting.

With the foundation of Paşabahçe in 1935, the production and distribution of slim-waist tea glasses also gain pace. Tea is then turns into a beverage that is accessible by everyone, and unites the people in the choice of "slim-waist" tea glass and soon becomes a common ground for the society. In the entertainment culture of the Republican Turkey, serving tea is started to be seen as a communication means representing simplicity, modesty, hospitality, sincerity, helpfulness, sharing, joy, elegance, sentimentality, kindness and pleasure, and this concept gains strength with the slim-waist tea glass figure.

There are several important reasons as to why slim-waist glass is this much preferred and used. First of all, it helps tea to stay warm, which enhances the taste of tea. The glass can show the smooth, bright and transparent color of tea, and thus does not affect the taste and smell of tea.

There are several theories attempting to explain how the "slim-waist" has taken its current form. One of the theories alleges this slim-waist form of glass was inspired by the tulip, one of the most important symbols of the Ottoman. The "slim-waist" glass resembles to a tulip physically, and is produced in the size of a tulip flower.

Whichever theory is true, the iconic "slim-waist", which "gives tea its form" and which is now present in all houses thanks to Paşabahçe, continues to turn the tradition of drinking tea into a joyful experience for all the five senses. Since it is produced of a colorless transparent material, it shows the true color of tea, and since glass has no smell or taste, one can easily sense the distinctive smell and taste of tea. The small-sized curved form makes it possible to safely and comfortable capture the glass using only two fingers, and feel the warmth of tea, that is so inviting.

TEA CEREMONIES AROUND THE WORLD

ANADOLU'DA ÇAY KÜLTÜRÜ

Pek çok kaynaktı Türklerin çayla, Anadolu'ya girmeden önce Orta Asya'da tanıtlıkları söylenilir. 19. yüzyılın sonlarına doğru Doğu Karadeniz halkının çay yetiştirdiği ve ilkel metotlarla işleyip bu ürünü kullandıkları ve sattıkları da sahip olduğumuz bilgilerden biridir. Türkiye, 2000 yılların başında, yılda, kişi başına 2,3 kg çay tüketimi ile Kuzey İrlanda ve İngiltere'nin ardından üçüncü sıra da yer alır.

Her on Türk'ten dokuzu her gün çay içer, her üç Türk'ten biri de kendi çay harmanını yaratır. Az önce bahsettiğimiz demleme teknikleriyle demlenen çay, demi ve suyu istenen oranda ayarlanarak bardaklara koyulur ve servis edilir. Çaya şeker istenirse sonrasında konulur. Az dem ile hazırlanan çay "açık çay" olarak tabir edilirken, dem oranı yükseldiğinde bu çaya "koyu çay" denir. Ancak çayın ideal demlenme ve sıcak su oranını belirleyen ölçüt "tavşankanı" niteliğine uygun olmasıdır. Kırmızı bordo rengine sahip tavşankanı ayarındaki çay, Türkiye'de çay üzerinde uzlaşılmış idealik ölçütür. Bununla beraber "paşa çayı" genellikle çocukların için hazırlanır. Pratik olarak sıcak çaya soğuk su ilavesi ile elde edilir. Paşa çayından tavşankanı çaya geçiş bir

bakıma çocukluktan yetişkinliğe geçiş simgelemektedir. Çayın ikramında, yöresel farklar göze çarpır. Anadolu'da çay bardağının üzerinde mutlaka "dudak payı" adı verilen bir boşluk bırakılır. Bu boşluğun bir ölçüsü yoktur. Boşluğun miktarının azlığı veya çokluğu çay sohbetlerinde esprilere sebep olur. Erzurum ve çevresinde ise ikramı genellikle açık renkli ve kaşksız olarak yapılan çay, "kitlama" diye tabir edilen özel bir yöntemle tüketilir. Makaslarla, elle ya da ısırlarak koparılan ufak şeker parçalarının dil altında bekletilmesi suretiyle çay içili. Bununla beraber bu bölgede misafir yeter demedikçe çay sürekli olarak tazeleşen. Çay koymak anlamında "çay dökmek" ya da "çay tazelemek" deyimleri kullanılır. Teşekkür edip, başka istemediğinizi söyleseniz bile mutlaka bir bardak daha ikram edilir. Bunun adı "cirildim" yani zor çayıdır. Cirildim çayını içmemek ise ev sahibine karşı büyük bir hakaret anlamına gelir. Diğer bölgelerde ise daha fazla çay istenmediğini göstermek için kelimele gereklidir. Çay kaşığı son içilen bardağın üzerine konur. Zaman içinde dostluk ve misafirperverliğin simgesi olan bu içecek sayesinde günlük yaşam bu bitki etrafında şekillenir.

TEA CULTURE IN ANATOLIA

A number of resources state that Turks first learned about tea in the Central Asia before coming to Anatolia. It is also known that people living in Eastern Black Sea region cultivated tea by simple methods at the end of the 19th century to use and sell the produce. With a 2.3 kg tea consumption per capita at the beginning of the 21st century, Turkey comes after Northern Ireland and England as the third most tea consuming country.

Nine out of ten Turks drink tea every day while one out of three Turks creates his/her own tea blend. The tea brewed following the above-stated methods is poured into glasses and served with the tea and water in an amount preferred. If desired, sugar is added to the tea.

Tea with large amount of water is called "açık" (light) tea while the water content decreases, it's called "koyu" (dark) tea. However, the ideal rate and color of tea and hot water in Turkey is called "tavşan kani" (literally rabbit's blood) with its red-maroon color. Children usually drink "paşa çayı" (pasha tea), which is prepared by adding cold water to hot tea. Starting to drink "tavşan kani" tea is almost seen as a rite of passage. Tea preparation varies locally. In Anatolia, a gap called "dudak payı" (lip space) is left at the top of the tea glass. There is no fixed space, which leads to pleasanties while tea is served.

In Erzurum and its environs, usu-ally light tea is served without any spoon, and consumed by a spe-cial method called "kitlama". Small lumps of sugar broken with scissors, hand or by biting are placed under the tongue, and then tea is drank. In this region, a new cup of tea is served until the guest says enough. Even if you say you don't want another cup, a last cup of tea is served, which is called "cirildim". Not drinking the "cirildim" tea is seen as a great insult to the host. In other regions, the teaspoon is put on the tea glass to indicate that you don't want another cup. This plant shapes the daily life thanks to this drink which is the symbol of friendship and hospitality.

DÜNYADA ÇAY SEREMONİLERİ

Japon Çay Seremonisi

Dünya'nın en ünlü çay seremonisi Japonya'da hala sürdürmeye devam ediyor. Japonlar çay içme işini sanatsal ve felsefi zenginliklerle birleştirip uygularlar. Hemen her Japon evinin bahçesinde çay seremonisi için, Hoshoan adı verilen; ancak bir kişinin alâckârgönüllülüğünü ifade etmesi amacıyla "başını eğerek" girebileceği kadar küçük evler vardır. Seremoniler adeta meditasyon gibi, oldukça katı kurallarla uygulanan demleme ve sunum aşamalarıyla geçer.

Çin Çay Seremonisi

Seremoninin servis merkezinde izgaralı bir bambu tepsi vardır. Gong Fu (diğer adıyla Kung Fu) seremonilerinde geleneksel olarak ev sahibi, konuklarına ve doğaya olan saygıını ifade eder.

Chinese Tea Ceremony

There is a bamboo tray with grill in the service center of the ceremony. Traditionally, in Gong Fu (also known as Kung Fu) ceremonies, the host expresses his/her respect for guests and nature.

Kore Çay Seremonisi

Zen Budizmi dahilindeki sadelik ve hoşluk kutları Gong Fu (diğer adıyla Kung Fu) seremonilerinde geleneksel olarak ev sahibi, konuklarına ve doğaya olan saygıını ifade eder.

Korean Tea Ceremony

The simplicity and pleasantness within Zen Buddhism is celebrated in this ceremony. The tea set is used for the purpose of calming and relaxing the mind with its simple form.

Japanese Tea Ceremony

The world's most famous tea ceremony still continues in Japan. The Japanese enriches the practice of drinking tea with art and philosophy. In the garden of almost every Japanese house, there is a house, called Hoshoan, which is so small that one can enter only by "tilting his/her head" to express humility. The ceremonies, like meditation, go through the steeping and presentation stages that are practiced with strict rules.

Pişirmenin tarihi

Günümüzde pek çok kaynaka insanın ateşi kontrol edebildiği andan itibaren yemek pişirme denemelerine başladığı söylenir. Yemek pişirmenin 500 bin yıl önce başlamış olması olası. İnsanlık tarihi düşünülürse, çok geç bir tarih asılına bakılırsa. Yemek pişirmek, sadece besinleri çiğ halden pişmiş hale getiren bir iş değil. Yapılan araştırmalar, yemek pişirmek için bir takım aklı yeteneklere sahip olunması gereğine işaret ediyor. Bu yeteneklerle birlikte gelişen yemek pişirme teknikleri yeni ihtiyaçlar doğuruyor, ihtiyaçlar da yeni teknikleri.

The history of cooking

Nowadays, in many sources, it is said that humans began to experiment with cooking since the start of controlling fire. It's possible that cooking started 500,000 years ago. Considering the history of humanity, it's a very late date.

Cooking is not just making raw food cooked. Studies show that there is a need for cognitive skills to cook. The cooking methods developed with these skills create new needs, which in turn create new methods.

Mikro Bahçecilik
Micro Gardening

Mikro bahçecilik bir diğer adıyla balkon bahçeciliği, çok çeşitli sebzelerin, kök ve yumruların, küçük balkon, teras ve çatılarda yetiştirilmesidir. Mikro yeşillikler, sebze, ot, baharat ve baklagillerin tohumlarından çıkan, ilk filizlenen küçük yapraklı halleridir bu sebeple de vitamin, mineral ve bitki proteini konusunda oldukça zengin bir içeriğe sahiplerdir. Mikro bahçeler ekonomiktir, herkes tarafından kolayca yapılabilir. Ufak, bir metrekarelik bir alanda bile mikro bahçenizi kurabilirsiniz. Su gereksinimi oldukça azdır. Evde yetiştirmek için öncelikle ihtiyacınız olan şey uygun sıcaklıktır. Evin içinde oda sıcaklığına ek olarak, güneş ya da yapay bir ışıkla yetişebilirler. Günlük minimum dört saat güneş ışığı ya da floresan ışıkla beslenmelidirler. Mutfakta kullanılan dolap altı ışıklardan da faydalansılabılır. Mikro yeşilliklerinizin sürdürülebilir olmasını isterseniz, çıkan yeşillikleri makas ile kesip almanız gereklidir. Böylece tohumlarınız sürekli olarak uzayıp size hasat verecektir. Mikro bahçe sayesinde evinizde, her an tüketime hazır taze baharat ve sebzeler bulundurabilirsiniz.

Micro gardening, also known as balcony gardening, is the cultivation of a wide variety of vegetables, roots, and tubers on small balconies, terraces, and roofs. Micro greens are the first sprouting small leaves from the seeds of vegetables, herbs, spices, and legumes, and therefore they have a rich content in terms of vitamins, minerals, and plant protein. Micro gardens can be easily made by anyone without any economic expenses. You can build your micro garden in a small, one square meter area. Water requirement is very small. The right temperature is the first thing you need at home. In addition to room temperature inside the house, they can be grown with sunlight or artificial light. They should be fed daily for a minimum of four hours of sunlight or fluorescent light. Under-cabinet lights used in the kitchen can also be used. If you want your micro greens to be sustainable, you need to cut the greens that come out with scissors. So your seeds will grow and provide yield. Thanks to micro gardening, you can have fresh spices and vegetables at home at any time.

KAHVALTININ ÖNEMİ

Kahvaltı altın öğündür. Gece uyku boyunca kendini dinlenmeye alıp, güne hazırlık yapmak için çalışan vücut, tüm gün ihtiyaç duyacağı enerjiyi gün başında kahvaltidan alır. Düzenli kahvaltı kan şekerini dengeler, sinir sisteminin düzgün bir şekilde çalışmasını sağlar. Kültürler ve yeme alışkanlıkları, iklim ve coğrafyalarının sağladığı besin çeşitliliğiyle bağlantılı olarak hemen her milletin kendine özgü kahvaltı alışkanlıkları vardır.

Günümüzde kahvaltı, besin değeri yüksek çok çeşitli ürünlerle, oldukça lezzetli ve keyif dolu bir biçimde yapılmıyor. Bu keyifli alışkanlık, insana verdiği mutluluk sebebiyle gün içindeki diğer öğünlerle kolayca yer değiştirebiliyor. Sadece kahvaltı servisi yapan mekânlar her geçen gün artarken, ev dışında kahvaltı yapmak, özel kahvaltı buluşmaları yapmak, günün her saatı kahvaltı yapmak da adeta bir moda akımı olmuş durumda.

THE IMPORTANCE OF BREAKFAST

Breakfast is the golden meal. The body takes a rest during the night sleep and tries to prepare for the day. For this reason, the body gets all the energy it needs all day from breakfast. A regular breakfast balances blood sugar, allowing the nervous system to function properly. Almost every nation has its own breakfast habits in relation to cultures and eating habits, climate and geography.

Nowadays, breakfast is made with a wide variety of highly nutritious foods in a delicious and enjoyable manner. Due to the happiness it gives to people, this pleasant habit can easily change places with other meals during the day. While the places that serve only breakfast increase day by day, having breakfast outside home, making special breakfast meetings and having breakfast every hour of the day have become almost a trend.

Patisserie: For the sweetest presentations

En tatlı sunumlar için Patisserie

Yerel ürünler, doğal ve taze, hızlı tüketilecek ürünler ve yemekler son günlerin trendi. Artık bize uzak coğrafyalara özgü ürünlere ürünleri kolayca ulaşabiliyoruz. Temiz ve sağlıklı yemek tüketimi, bol tahıl, sebze ve şekeri düşük meyveler hala popülerliğini koruyor. Sunum gücü, görselliği kuvvetli küçük porsiyonlar, taze veya kısa sürede tüketim ile hayatlarında olacak. Bu sebeple bu yemeklerin cam patisserie ürünleri içinde saklanması, hem tüketim hızını destekleyen hem de cam içinde sağlıklı muhafaza koşulları hem de mutfağa kattığı görsel estetik değerlerle, oldukça önemli. Patisserie ürünlerinin farklı ebatlarında farklı porsiyon ve büyütüklüğe, sayıya sahip her türlü ürünü muhafaza etmeniz ve hatta sunumlarını da bu şekilde yapmanız mümkün. Patisserie tanımı akla ilk olarak; tatlı, pasta gibi un işi besinleri getiriyor olsa da, sizi yanıtmasın. Patisserie serisi, meyve, sebze, hemen hemen tüm tatlı ve tuzlu yemek sunumları için ideal.

Local products, natural and fresh, fast consumed products and dishes are now trending. Now, we can easily reach products native to faraway places. The consumption of clean and healthy food, abundant amount of grains, vegetables and fruits with low sugars maintains its popularity. Visually powerful small portions with a strong presentation style for consuming fresh and fast will be in our lives. Therefore, preserving these dishes in glass patisserie products that embellish the kitchens is very important for supporting both the consumption speed and providing healthy preservation conditions within the glass. For preserving and presenting foods in any portion, size and number, there is a patisserie product with the right size. Although the word "patisserie" evokes firstly bakery products, Patisserie series products are also ideal for fruits, vegetables, and almost all sweet and salty food presentations.

SAĞLIKLI BESLENME ANLAYIŞINDA YENİ TRENDLER

Günümüzde profesyonel mutfaklar, çok daha bilimsel, steril imkanlara sahip ve gelişme adına araştırmalar yaparken, bir yandan da geçmişin doğallığına olan özlem giderek artıyor. Evde üretilen ve doğal bir şekilde zamanında tüketilen ürünler hemen hepimizin hayatına tekrar girmiş durumda. Hızlı tüketimde, zamansızlık ya da bilgi eksiliğiyle mahrum kalınan ev yapımı lezzetler, artık bize çok yakın. Kolay araştırılabilir, ulaşılabilir tarifler ve yapım teknikleri, aksesuar ve ekipman sayesinde pek çok besinimizi evde temiz koşullarda, istediğimiz kıvamda üretip tüketmemiz mümkün.

Probiyotik tüketim de sağlıklı beslenmek ve yaşamak anlamında en önemli rutinlerden biridir. Yeterli miktarda yenildiğinde insan ya da hayvan sağlığını olumlu yönde etkileyen mikroorganizmalara probiyotik denir. Özellikle ev yapımı probiyotikler, yoğurt, kefir, turşu ve sirke tüketimi insan sağlığı için oldukça önemlidir.

NEW TRENDS IN HEALTHY NUTRITION

While professional kitchens with much more scientific and sterile facilities carry on doing researches on behalf of development, the desire for the naturalness of the past is increasing. Products that are made at home and consumed in a natural way are reintroduced into the lives of all of us. Home-made delicacies that we are deprived of due to fast consumption, timelessness or lack of information are now very close to us. Thanks to easily searchable, accessible recipes and methods, accessories, and equipment, it is possible to make and consume many foods at home in clean conditions however we like.

Probiotic diet is one of the most important routines for healthy eating and living. Microorganisms that affect human or animal health positively when they are consumed adequately are called probiotics. Especially the consumption of homemade probiotics such as yogurt, kefir, pickles and vinegar is very important for human health.

YOĞURT YAPIMI

Hazır gıdaları olabildiğince az tüketmek en doğrusu. Evde kendi imkânlarınızla hazırlayacağınız pek çok temel besin çeşidi var. Yoğurt bu besinler arasında belki de en faydalı ve kolay hazırlanabilir olanı. Her ögün tüketilecek, yemeklerin üstünde ya da yanında, sade, yulaf ve kuru meyvelerle karıştırarak pek çok farklı lezzet yakalamanın mümkün olduğu, mucize bir gıda yoğurt. Evde hazırlaması; etap etap kolay gözükse de dikkat edilmesi gereken çok ince detaylar da barındırıyor tarafında.

Öncelikle, mümkünse çok taze ve organik bir günlük süt tercih edin. Kullanacağınız mayanın da aynı şekilde organik ya da ev yapımı yoğurt hayatı olması önemlidir.

Sütü çelik bir tencerede kapağı açık bir şekilde orta ateşte kaynatın. Kaynamaya başladığında köpürerek taşmaması için çok hızlı olmalısınız. Taşmayı engellemek için tencerenin üstüne tahta bir yemek kasığı da yerleştirebilirsiniz.

Ateşi kapatıp sütü biraz soğumaya bırakın. Süt serçe parmağınızla dokunduğunuzda hafifçe ısrarcık kıvama geldiğinde sütü cam ya da seramik, kapaklı bir kaba alın.

Kabi, kalın ve tüm kabi katlayarak kaplayacak bir örtünün üzerine yerleştirin ve bu andan itibaren hiç hareket ettirmeyin. Yerleştirdiğiniz yerin ışık almaması ve ilk olması önemlidir.

Mayanızı da süte ekleyerek tahta bir kaşık yardımıyla karıştırın. Ve yine hiç yerini değiştirmeden kapağını kapatıp, örtüyle her yerini kapatıp sarın.

Bes ya da altı saat sonra yoğurdu alıp çok fazla hareket ettirmeden kabıyla birlikte buz dolabına yerleştirin.

Yoğurdun bir gün boyunca buz dolabında kalması en idealidir. Bir gün bekledikten sonra artık nefis ev yapımı yoğurdunuz hazır.

HOW TO MAKE YOGURT

It is best to consume packaged foods as little as possible. There are many basic types of foods that you can prepare at home. Yogurt is perhaps the most useful and easily prepared among these foods. Yogurt is a miracle food that can be consumed with every meal. You can obtain many different flavors by using only the yogurt or by mixing it with oats, dried fruits, etc. on the dishes or as a side. Although it seems easy to prepare at home, it contains very fine details that need attention:

First of all, choose fresh and organic daily milk if possible. It is important to use an organic yeast or homemade yeast.

In a steel pot, heat the milk on medium heat with the lid open. You must be very quick to prevent overflowing as the boiling starts. You can also place a wooden table spoon on top of the pot to prevent overflow.

Turn off the fire and allow the milk to cool slightly. If the milk is slightly hot when you touch it with your little finger, take the milk into a glass or ceramic container with lid.

Place the container on a think covering such as blanket that will cover the whole container when folded onto the container. Do not move the container from this point on. It's important that the container does not get light and the environment is warm.

Add the yeast to the milk and stir with a wooden spoon. Without moving the container, close the lid and cover the container with the covering.

Take the yogurt after five or six hours and place it in the refrigerator with the container without moving it too much.

It's best to refrigerate the yogurt for a day.

After one day, your delicious, homemade yogurt is ready.

TURŞU YAPIMI

Turşunun sırları tarifinde başrol oynucuları, tuz, su ve sirke dir. Bu karışım içine yerleştirilen pek çok sebzelerin ve meyvelerin bekletilmesiyle elde edilir. Geleneklerimizin bir parçası, Türk yemek kültürünün önemli besinlerinden biridir. Turşu kurmak yani turşu yapmak için cam bir kavanoz tercih etmelisiniz. Kullanacağınız kavanoz kaç kilouluk ise yarısı kadar turşuluk malzeme ve yarısı kadar suyu bir araya getirmelisiniz.

Turşu kuracağınız cam kavanozu bol suda yıkadıktan sonra kurulayıp ve kavanozun taban kısmına turşuya ekşiliğini verecek kuru nohut ve sarımsaklıları yerleştirin. Nohut aynı zamanda turşunun kolay mayalanmasını sağlar.

Turşusu yapacak ana malzemeyi aralarında az boşluk kalacak şekilde dizin ve ara katlarına sarımsak ekleyin. Ardından üzüm sirkesini içine dökün. Salamura karışımına ekleyeceğiniz suyun ölçüsünü tam olarak belirlemek için sebzelerin üzerine gelecek kadar içme suyu ekleyip karışımı ayrı bir tencereye boşaltın.

Kaya tuzu, limon tuzu, kınis tohumu ile karıştırdığınız salamura karışımını yeniden turşu kavanozuna dökün. Suyla birlikte altta kalan sebzelerin yüzeye çıkmaması için üst kısmını aşma yaprağı, dereotu, maydanoz gibi taze otlarla örtün.

Oda sıcaklığında ve güneş görmeyen bir yerde 15-20 gün kadar saklayın ve sonra da keyfini çıkarın.

HOW TO MAKE PICKLES

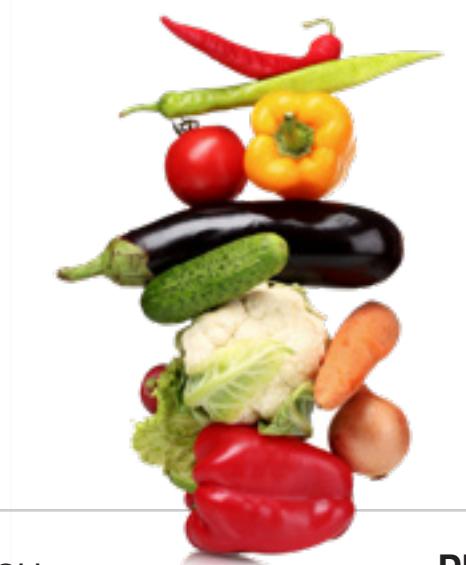

The stars of the magical recipe of pickles are salt, water, and vinegar. Pickle is made by placing many vegetables and fruits in this mixture and letting them rest. Pickle is part of our traditions and one of the most important foods of Turkish food culture. You should choose a glass jar to make pickles. You should fill half of the jar you use with water and the other half with the vegetables and fruits you want to pickle.

After washing the glass jar with plenty of water, dry it and place dried chickpeas and garlic that will give the pickle sourness to the base of the jar. Chickpea also provides easy fermentation of pickles.

Place the main ingredient to be pickled in layers with little space in between and add garlic between the layers. Then pour the grape vinegar. To determine the exact amount of the water you will add to the pickle mixture, add the drinking water up to the top of the vegetables and pour the mixture into a separate pot.

Add rock salt, lemon salt, and coriander into the brine, and then fill the brine into the pickle jar again. Cover the top with fresh herbs such as vine leaves, dill, and parsley so that the vegetables do not come to the surface with water.

Preserve up to 15-20 days at room temperature and in a sunless place. Then enjoy your homemade pickles.

SALÇA YAPIMI

Salça yapımı hem geleneksel bir tören hem de lezzetli bir yatrımdır. Kişi boyunca taze olarak bulamayacağınız domatesi kullanabilmenizi sağlar. Salça şöyle yapılır; yıkanan ve sapları koparılan domatesleri ikiye ya da dörde bölün. Domatesleri derin bir kaba aktarın. Kabuklarından ayrılan kadar birkaç gün kapta bekletin ve ara ara tahta kaşıkla karıştırın.

Birkaç gün sonunda, ince delikli bir süzgeç kullanarak domatesleri çekirdeklerinden ayırin. Elde edeceğiniz püreyi ince bir tülbütentten ya da bez torbadan geçip süzün. Kalan püreyi salçaya dönüştürmek için püreyi geniş bir tepsiye boşaltın ve bir miktar tuz ekleyip üzerini de ince tülbüntle örtüp güneşe bekletin. Ara sıra tahta kaşıkla karıştırın. En geç bir haftada domates salçanız kullanıma hazır olacaktır.

After a few days, separate the tomatoes from the seeds using a fine-meshed strainer. Pass the mash through a thin cheesecloth or cloth bag and strain. To turn the mash into paste, empty the mash into a large tray, add a little salt and cover the tray with a fine cheesecloth. Occasionally stir with wooden spoon. Your tomato paste will be ready for use at the latest in one week.

KEFİR YAPIMI

Kefir, değeri son yıllarda anlaşılmış, ilaç niyetine tüketilebilecek probiyotik bir içecektir. Elbette hazır olarak da alıp tüketebilirsiniz fakat ev yapımı olması çok daha güvenilir ve sağlıklı. Kefir yapmak için 1 litre süt, 1 yemek kaşığı kefir taneleri, cam kavanoz ve plastik süzgeç ihtiyacınız var. Yapılışına gelince; sütü kaynatın, oda sıcaklığına gelene kadar bekleyin ve kaymayı üzerinden alın. Süte kefir tanelerini ekleyin.

Metal kapta yaptıığınız bu işlemde, tahta kaşıkla iyice karıştırarak devam edin. Üzerini temiz bir bez ile kapatın. 20-25 °C'de kalacak şekilde karanlık ortamda iki gün kadar bekletin. Bu sürede süt pihtlaşacaktır. Mayalandmış olan sütü plastik bir süzgeç ya da tülbütentle geçirerek süzün. Ev yapımı kefir hazır!

Continue with mixing with a wooden spoon. Cover with a clean cloth. Let it rest for two days in a dark environment at 20-25 °C. During this time, the milk will clot. Filter the fermented milk through a plastic strainer or cheesecloth. Your homemade kefir is ready!

HOW TO MAKE SALÇA

Making "salça" (tomato paste) is both a traditional ceremony and a delicious investment. It allows you to use the tomatoes that you will not find fresh during the winter. Tomato paste is made as follows; split the tomatoes into two or four. Transfer the tomatoes to a deep dish. Let them rest in a bowl for a few days until the skins easily separate while stirring occasionally with a wooden spoon.

After a few days, separate the tomatoes from the seeds using a fine-meshed strainer. Pass the mash through a thin cheesecloth or cloth bag and strain. To turn the mash into paste, empty the mash into a large tray, add a little salt and cover the tray with a fine cheesecloth. Occasionally stir with wooden spoon. Your tomato paste will be ready for use at the latest in one week.

SİRKE YAPIMI

Sırke insan sağlığı için en faydalı besinlerden biridir. Doğal meyveler, bakliyatlar, bal ve su ile evde sırke yapmanız oldukça kolay. Kullanacağınız meyvenin (elma, üzüm ya da nar), çok taze olmasına dikkat edin. Çürüklü meyveler sırkenin tadını bozar ve fermente olmasını engeller.

Meyveleri iyice yıkın, kabuklarını soymayın. Onlar sırkeleşme işlemi için çok önemli. Ardından temiz bir içme suyu hazırlayın. Mutlaka cam kavanoz kulanın. Meyveleri, bulgur, nohut ve bali ilave ederek silikon ya da plastik bir kaşık yardımıyla karıştırın.

Kavanozun ağzını bir tülbüntle sarın ve kapağını sıkıca kapatın. 20 gün kadar serin, kuru ve doğrudan ışık almayan bir ortamda bekletin. İki günde bir kapağını açıp karıştırmayı ihmal etmeyin. Bu şekilde bir "sırke anası" elde etmiş olacaksınız.

Onu dikkatlice cam bir kaba aktarın ve sırkenizi de tülbünten geçirerek cam şişelere boşaltın. Dilerseniz bu aşamada bali ile tatlandırabilir ya da tuz ilave edebilirsiniz.

HOW TO MAKE VINEGAR

Vinegar is one of the most beneficial foods for human health. It is easy to make vinegar at home with natural fruits, pulses, honey, and water. Make sure that the fruit (apple, grape, or pomegranate) you use is very fresh. Rotten fruits spoil the taste of your vinegar and prevent fermentation.

Wash the fruits thoroughly, do not peel the skins. They are very important for the process of vinegar. Then prepare a clean drinking water. Be sure to use glass jars. Add fruits, bulgur, nohut ve bali ilave ederek silikon ya da plastik bir kaşık yardımıyla karıştırın.

Wrap the mouth of the jar with a cheesecloth and close the lid tightly. Let it rest in a cool, dry and light-free environment for up to 20 days. Do not forget to open the lid every two days and stir. In this way, you will get "vinegar mother".

Carefully transfer the mother to a glass container and pour the vinegar into a glass bottle. If you wish you can also sweeten the vinegar with honey or add salt.

Yemeğin Tadı Tuzu *Bahartlar*

MÖ 5000 yıllarında ilkel insanın yemeklerini pişirirken, üzerine bulasıran küllerden ya da başka tozlardan korumak için ya da pişirmeden önce muhafaza etmek için kullandıkları yaprak ve bitkilerin, baharatın ilk adımını oluşturduğu söylenir. Yiyeceklerin bu yardımcı bitkiler sayesinde farklı lezzetler kazandığını farkeden insan, deneyimsel düşünerek başka bitkileri, kökleri ve kabukları da deneyerek besinlerini çeşitlendirir. Bugüne kadar tüm bu denemelerden ortaya çıkarak tek tek isim kazanan pek çok bitkinin çekirdek, tohum, meyve, kabuk, çiçek, kök ve yaprağının parçalanması, ezīmesi, kurutulması ve öğütülmesi ile elde edilen besinlere "baharat" diyoruz. Baharatlar, az miktarlarda kullanılan fakat lezzet olarak etkisi büyük ve coğunlukla besinleri dengeleyen ve doğru kullanıldığında oldukça faydalı gıdalarıdır.

Baharat ismi, eski zamanlarda baharatın coğunlukla geldiği ülke, Hindistan'ın yerlileri tarafından ülkemelerine verdikleri Sanskritçe "Bharat" isminden gelir. Arapça dilinde de bahar koku, baharat ise çoğul olarak kokular anlamına gelir.

Tüm dünya milletlerine yayılmış ve kültürlerine, beslenme alışkanlıklarına yerleşmiş belli başlı baharatlar vardır. Günümüzde muhtemelen baharatın en fazla kullanıldığı mutfağı Hint mutfağıdır.

Fransız ve İtalyan mutfaklarında da baharat büyük bir öneme sahiptir. Ülkemizde de baharat, her bölgede farklı farklı çeşitleriyle bolca kullanılmaktadır.

It is said that the leaves and plants used by primitive man around 5,000 BC to protect the cooking food from ashes or dust, or to preserve the food before cooking, constitute the first step to the world of spices. Realizing that food has gained different flavors thanks to these auxiliary plants, humans diversify their food by experimenting with other plants, roots, and shells. Foods obtained by chopping, crushing, drying and grinding seeds, fruits, peels, flowers, roots and leaves of many different plants, which have become known thanks to these experiments, are now called "spices. Spices are very useful foods, which are used in small amounts, but have a great effect on the flavor and which generally balance the nutrients and provide health benefits when used correctly.

Ürünlerin farklı amaçlarla kullanımı

Günümüzde artık çok ürün sadece tek bir amaca hitap ederek kullanılmıyor. Evde kullandığınız tüm ürünler sadece belli başlı alanlara mahkum olmadan, sizin de yaratıcılığınızı sınırlamadan, farklı alanlarda kullanımlara sahip olabilir. Bunun hem ruhunuza, hem göz zevkinize hem de harcamalarınıza pozitif katkısı olacaktır. Mutfakta görevini tamamlamış bir ürün salonda ya da evin başka bir bölümünde yeniden hayat bulabilir. Mutfakta kullandığımız pek çok ürünü, çok farklı şekillerde kullanma şansınız var. Bir kavanozu içine fotoğraflarınızı yerleştirip çerçeveye dönüştürebilir, bir cam fanusu içine telefonunuza yerleştirip müzik açarak doğal bir hoparlöre çevirebilir, bardaklarınızı içine en sevdiğiniz çiçekleri yerlestireceğiniz bir vazو olarak kullanabilirsiniz. Her bardak bir mumluğa dönüşebilir, kapaklı patisserie ufak bir saksı bitkisi için eve dönüşebilir.

Use of products for different purposes

Nowadays, many products are not used for only one purpose. All products you use at home can be used in different areas without limiting your creativity, without being confined to certain areas. This will contribute positively to your soul, eye pleasure, and spending. A product which completes its life in the kitchen can be revived in the living room or in another part of the house. You can use many kitchen products in many different ways. You can put your photos into a jar and turn it into a frame, place your phone into a bell glass to turn it into a natural speaker, or use your glasses as a vase to put your favorite flowers. Each glass can be converted into a candle holder while a patisserie product with a lid can be home for a small potted plant.

ZESTGLASS

Yemek pişirmek;
adeta bir terapi

Cooking as therapy

Yemek pişirmek bir sanat, bir terapi adeta. İnsan psikolojisi üzerinde de oldukça pozitif etkileri var.

Yemek pişirmek sevginin dışa vurumudur çoğu zaman. Hem kendinize hem de sevdiklerinize karşı bir sevgi ifade biçimidir bu. Yemeği sevgiyle hazırlamanın içeriğe lezzet anlamında katkı sağladığı, bilimsel olarak kanıtlanmasa da hepimizin katıldığı bir gerçek.

Yemek pişirken düşünçelerinizi toparlayıp aklınızdaki bir düzene sokabilirsiniz ya da tam tersi zihninizi boşaltıp, rahatlayabilirsiniz. Yemek pişirme sürecinde sahip olduğunuz kontrol, size bir denge verir.

Tüm duygularınızı aynı anda çalıştırır ve siz motive eder. İçinizdeki olumlu duyguları açığa çıkarır. Ruhunuzu besler. Yemek pişirken sağladığınız koordinasyon, farkındalığınızı artırır.

Birlikte yemek pişirmek en iyi iletişim biçimidir.

Cam, yemek yaparken kullanacağınız en sağlıklı malzemeden. Borcam, isya dayanıklılığı ve kolay temizlenebilme özelliğiyle bu sağlıklı ürün grubunun başında gelir. Tatlı, tuzlu, sulu ya da değil, hemen her yemeği Borcam ile pişirebilir ve servis edebilirsiniz. Sunum anlamında büyük bir avantaj sağlar Borcam. Şıklığı yesinde servis sırasında sunum tabağı olarak da kullanılabilir ve hatta sonrasında buzdolabında muhafaza etmek için kapaklı versiyonlarından faydalanabilirsiniz. Yeni Borcam Non-stick'in yapışmazlık özelliği ile yağlama ihtiyacı duymaksızın yemek pişirebilir ve bu özelliğini sayesinde de kolayca temizliğini sağlayabilirsiniz.

Cooking is almost an art, a therapy. Cooking also has positive effects on human psyche.

Cooking is often the expression of love. It's a way of expressing love for yourself and your loved ones. Even if it's not scientifically proven, we all agree on that the preparation of food with love contributes to the flavor.

When you are cooking, you can put your thoughts together and put them in order in your mind. Or you can empty your mind and relax. The control you have during the cooking process gives you a balance.

Cooking addresses all your senses at the same time and motivates you. It reveals positive feelings within you. It nourishes your soul. The coordination you provide while cooking increases your awareness.

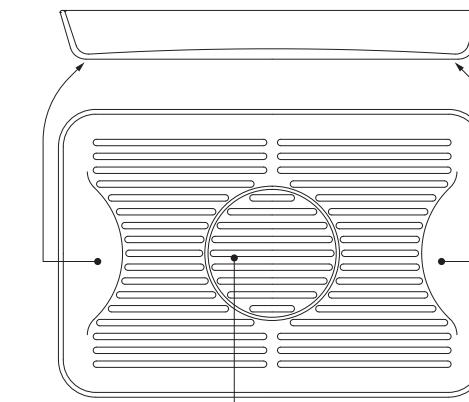

Cooking together is the best form of communication.

Glass is the healthiest material to use when cooking. With its heat-resistant and easy-to-clean properties, Borcam is one of the leading brands in this product group. Sweet, salty, juicy or not, you can cook and serve almost any dish with Borcam. Borcam provides a great advantage in terms of presentation. Thanks to its elegance, it can be used as a serving platter during the service and you can also use the products with lids in the refrigerator. With the non-stick feature of the new Borcam Non-stick, you can cook without greasing and you can easily clean it.

Dış bükey şekillendirilmiş taban sayesinde fazla yağ tepsinin kenarlarında bulunan çukurlarda toplanır
Due to the convex surface fat is collected in both sides cavities

↓ Dairesel alanda toplanan yağ aşırı kurumayı öner
Some fat stays in the centerpiece to prevent the food from drying

Grill Borcam'ın izgara olukları fırın ısısını yemeğinizin her yerine eşit dağıtır.

Oluklar arasından süzülen fazla yağ ve su dış bükey şekillendirilmiş taban sayesinde tepsinin kenarlarında bulunan çukurlarda toplanarak yemeklerinizin kızarmasını ve çitir çitir olmasını sağlar. Tabanın ortasında yer alan dairesel alan ise aşırı kurumayı öner.

Tüm bu küçük detaylar sayesinde kırmızı et, tavuk, balık ve sebzeleriniz en mükemmel şekilde pişerek sağılılı, hafif bir o kadar da lezzetli olur. Grill Borcam'larla izgara keyfinizi sağıltan ödünen doya doya çıkarn.

Ribbed Grill Borcam has a self-draining baking tray with a convex surface and a peripheral channel for collecting fat or grease from the baked meat or food. The dimension of this centered piece is just enough to prevent the food from drying. The excess fat is collected in the cavities on both sides of the tray due to the convex surface. As a consequence the food is prevented on the baking surface from contacting the excess fat or grease.

Additionally the gutters provide an airflow on the bottom which causes a quick evaporation of the grease accumulated under the meat to achieve a crispy bottom.

The great advantages of using Grill Borcam instead of a conventional baking tray is: the food is less fatty and therefore healthier and tastier.

DECOWARE

DEKORLU ÜRÜNLER

Art of Design

Bu kategoride doğanın tüm renklerinin, eşsiz tasarımlara sahip göz alıcı desenlerle birlikte son teknoloji baskı ve boyama teknikleri ve sağlığa zarar vermeyen çevre dostu özel boyalar kullanılarak hayat bulduğu rengârenk Paşabahçe koleksiyonları yer almaktadır.

This category compiles brand new colorful collections of Paşabahçe, carrying all hues of nature combined with unique designs, produced with ultimate printing technologies and eco friendly, healthy special paints.

SOFRA TASARIMININ ÖNEMİ

Yemeklerin sunumu ve içerikleri kadar, sofrada yaptığınız düzen de yemeğinizin lezzetine lezzet katar. Tat alma duyusu, koklama görme ve dokunma duyusu ile bir araya geldiğinde, insanın yemekten alacağı hazrı yükseltir. Bu sebeplerle görme duyumuzu doyuracak, yemeklerle bağlantılı iyi bir sofra stylingi, sunduğumuz yemeğin niteliğine büyük katkı sağlayacaktır. Sofra stylingini bir bütün olarak değerlendirin ve sunduğunuz yemeklerin içeriğiyle birlikte bir konsept belirleyin.

RENKLER VE DESENLERİN İNSAN PSİKOLOJİSİNDEKİ ETKİSİ

Renkler ve desenlerin evde kullandığımız objelerde kullanımının çok farklı sebepleri var. Kullanılan desenlerin, tonların insan bilincinde oldukça büyük etkileri vardır. Sevdığımız şeyleri, yaşam içinde kullandığımız objeler üzerinde görmemizin olumlu etkileri vardır. Kişi günlerinde, bembeyaz karları, doğada hayatı kalan yeşil dalları, yeni yılın getirdiği pozitif ruhu, sıcak dokuları, sıcak lezzetleri, yılbaşındaki umut dolu ruhu simgeleyen desenlerle etrafımız sıcak, pozitif öğelerle sarılıyor.

THE IMPORTANCE OF TABLE STYLING

Table styling is important almost as much as the dishes served, the presentation of dishes, and the ingredients. When the sense of taste teams up with the sense of smell and the sense of sight, it increases the pleasure of eating to new heights. For these reasons, a good table styling related to the dishes, which will satisfy our sense of sight, will contribute greatly to the quality of the food presented. Consider the table styling as a whole and determine a concept together with the ingredients of the dishes.

THE EFFECT OF COLORS AND PATTERNS ON THE HUMAN PSYCHE

Certain colors and patterns are used in objects for many different reasons. The patterns and tones used have great effects on human consciousness. Seeing the things we love on the objects we use in daily life has positive effects. White snows of winter days are surrounded with warm, positive elements such as green branches that survive in nature, the positive spirit brought by the New Year, warm textures, warm flavors, patterns that symbolize the hopeful spirit of the New Year.
